To Whom It May Concern:

Is this really our last chance to be heard? We are tired, worn out and frustrated at your refusing to talk about density and traffic safety on the Proposed High Density Project on Calle Real/Patterson.

Do you live in this area? We all do and the fact (and I mean fact) that this project will create even more of a bottleneck on Calle Real and Patterson is inevitable, not occasionally but daily. Will accidents happen? Of course they will.

Does the project fit in with it's surroundings? No. Is it consistent with community plan aspirations? No. Is the project too tall and too dense? Absolutely.

The developer acknowledged the concerns we have about the other development happening right across the street. Right turns, left turns, bridge congestion, neighborhood impingement. All of it. I keep repeating myself. We have so many vacant buildings. Why can't developers gut and redo existing ones for their projects? Why do they have to find every single lot, corner, slice of land to develop without the concern, courtesy and care for the neighborhoods they squeeze into?

As a Board of Supervisors, we ask that you DO NOT decline hearing our voices at this next meeting. It is important. We need to be heard. Thank you.
