According to the California Department of Fish and Wildlife,

<https://www.wildlife.ca.gov/Fishing/Ocean/Grunion>

1. Tagging studies indicate that grunion do not migrate,

and

2. Few live for more than three years.

85% of the spawning habitat at Goleta Beach has been destroyed by the revetment over the last two years.

It is ***not acceptable*** to leave the rocks in place and wait to see what happens next.
