Hello,
I'm a Santa Barbara resident writing in support of the proposed lowered speed limits to improve safety for all road users. I am very familiar with many of the designated road segments in the SB and Goleta area. The existing posted speed limits on these stretches are too fast to be safe for people biking, kids going to school, cars exiting residential driveways, etc. Please approve the proposed changes to make our community safer and help us reach Vision Zero.

Thanks for your consideration,
Marie Hebert

Dear Santa Barbara County Supervisors,

I strongly support the speed limit reductions proposed at this meeting, December 3, 2024. The relationship between vehicular speed and traffic incidents leading to injury and death is well known and hardly bears repeating, except that apparently it does. The recent outbreak of crazy traffic mishaps on our county roads and highways cannot escape notice. So many of these could have been avoided if the vehicles had been traveling at a lower speed.

An emphatic YES to these speed limit reductions; let's continue the mission and create more safety corridors with reduced speeds. Let's make our county a safe place to drive, walk, and cycle.

Respectfully,

—steve
