Subject: Covid Face Covering Mandate Question

LATE
DIST

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

I am a concerned resident of Santa Barbara County residing in Goleta.

My question is in regards to the Covid face covering mandate. I understand that the county is waiting for cases to go below 6 per 100,000 people in order to remove this mandate. SARS COV 2 is now an endemic and is likely never to fully go away. Does this mean you are planning to extend this mandate indefinitely. Can you please provide me some clarification on the status of this mandate and when you are expected to remove this?

Also in response to Reynoso's comment that she is not aware of any adverse reactions to these vaccines I wanted to share with her the following information provided by the FDA...

On Oct 22, 2020, during a FDA Product Advisory Committee slide show presentation, deputy director of the Immunization Safety Office at the CDC, Tom Shimabukuro revealed a list of possible adverse reactions from the Pfizer Covid vaccine: "Guillain-Barré syndrome. Acute disseminated encephalomyelitis ("Characterized by a brief but widespread attack of inflammation in the brain and spinal cord that damages myelin – the protective covering of nerve fibers," according to NIH.) Transverse myelitis. Encephalitis/ myelitis/ encephalomyelitis/ meningoencephalitis/ meningitis/encephalopathy. Convulsions/seizures. Stroke. Narcolepsy and cataplexy. Anaphylaxis. Acute myocardial infarction. Myocarditis/pericarditis. Autoimmune disease. Death. Pregnancy and birth outcomes. Other acute demyelinating diseases. Non-anaphylactic allergic reactions. Thrombocytopenia. Disseminated intravascular coagulation. Venous thromboembolism. Arthritis and arthralgia/joint pain. Kawasaki disease. Vaccine enhanced disease. Multisystem Inflammatory Syndrome in Children.

I was personally vaccinated and did not suffer any adverse reactions however I do know several people that have bad debilitating reactions.

Where there is risk there must be a choice.

Thank you,
Alexandra Freeman

SB County representatives.

I am extremely unhappy with the handling of the covid myth being pushed by CDC, Santa Barbara county health dept. and supervisors. There is enough evidence now showing that Covid is nothing more than a virus on steroids. The vaccine is more dangerous than the Virus, Ivermectin works very well, I have used it! Vaccinated people may very well be super spreaders of this virus. Further it is my, and the American people' constituonal right to not take this jab if we/they chose not to. You are violating not only my Right but every person in this county' constitutional right not to take it. Shame on you, have you been watching our boarders and the hundreds of thousands who come here unvaccinated and not required to do so. You are violating your constitutional oath of office by not protecting me and others from the very threat they bring into our county ,and country unvaccinated.

Chuck Williams

Subject: Fwd: Stanford Doctor Jay Bhattacharya Calls Vaccine Mandates 'Unethical,' Says Patients Can Choose

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Hello,

The focus of this email is to drive home the point that none of your constituents have gotten a comprehensive report, detailing the local statistics on deaths and hospitalizations that indicate that the emergency measures being taken by the board are warranted. The local public health agency and its officers are either grossly incompetent or they are being obstructive and misleading in their data collection.

In the absence of their ability to provide the public concrete data, why don't you look to someone who has serious public health credentials? (see attached bio and recommendations)

I find it hard to believe that this board is satisfied (or so easily fooled) by the flimsy platitudes being given by local public health. I find it even more outrageous that none of you are taking it upon yourselves, in your positions of authority to insist on the data that public health has been withholding from Public records requests.

I have done my research and mandating anyone, ESPECIALLY children and teenagers to be vaccinated for Covid is unethical and reckless.

We now have global studies and the head of the CDC herself admitting that the vaccines DO NOT STOP TRANSMISSION.

"We do this to protect others" is a discredited argument and proven to be invalid. The population is no more at risk of "catching" Covid from an unvaccinated person than they are a vaccinated person. So why is any sane, rational person pushing ahead to mandate a vaccine that has the highest risk of death and disability than all previous vaccines combined?

I completely understand why the pharma companies are pushing forward...they make billions of dollars from testing, vaccines, boosters, and many drugs that are used to treat adverse reactions from the vaccine (blood thinners, shingle meds, anti inflammatories, heart meds, to name a few) Covid and the vaccines are the gift that keeps on giving for Big Pharma.

I completely understand why the globally installed puppet presidents and prime ministers are pushing forward with mandates and the tyranny of covid passports because "build back better" is a global program described in Klaus Schwab's book "The Great Reset" and on the World Economic Forum's website. The vax passports are the golden ticket for the globalists allowing unprecedented surveillance, control and data collection.

What I don't understand is how anyone at the county level thinks that by cooperating and participating in a crime against humanity for money and more power for an elite ruling class and global corporations...that they will somehow enjoy the spoils of this truly evil manipulation of the people? Just like every bad chapter in history, when the narrative falls apart and the truth is revealed, the elite skate away from their crimes fairly easily..but the middle to lower rank bear the brunt of the wrath and consequences. What will the consequences be when more people learn the truth about the "safety, efficacy and approval" lies that have been told? What will the consequences be when more people

learn early intervention with safe, cheap therapeutics could have saved so many lives but were withheld so the profitable vaccines could reign supreme?

What will the consequences be when the people find out their businesses were lost, or their children were deprived of socialization and a normal life for numbers in the county that never added up to more total deaths than years prior?

The truth always makes it's way to the surface...and every day I see more people realizing they have been lied to.

You are the faces the locals know and will associate with their suffering....they will blame you and they will demand accountability from you...because it is more attainable than going after Newsom, Biden or Klaus Schwab.

The mandates being handed down from the federal and state levels are unconstitutional and major companies like Delta Airlines are pointing that out and saying "no"

Every major political figure (Pelosi, Biden, Fauci, Psaki) has been on video as recently as 6 months ago admitting vaccine mandates are unconstitutional and inappropriate...yet here we are pretending they are laws. They are not legal and the people are taking a stand. Where there is risk, there must be consent. The public is not being informed about the ingredients, the experimental status, the lack of liability on the part of the companies and the government, or the risks.

Propaganda disseminated from public health through the county makes false claims of "safe, effective and approved"

Read the public health advisory from Dr Jay Bhattacharya of Stanford University ..it is much more reasoned, supported and logical than any advice or data that you are receiving from local public health.

The position the county has taken on mandates is unconscionable. Why is there no dialog permitted on this subject or research undertaken to shed light on the efficacy of these vaccinations and mask mandates? These vaccines are classified experimental emergency use or EUA Emergency Use Authorization. They are NOT approved as the media has falsely led many to believe. It should be up to the individual to determine what he or she allows into his or her body, not government, business, the media or Big Pharma. Please look into studies by top virologists with regard to treating this virus - McCullough, Zelenko, Ardis, Tenpenny, Merritt, and Cole to name just a few. And yes, Supervisor Hartmann, Ivermectin is a proven deterrent and cure. So is hydroxychloroquine. It's quinine for heaven's sake, a drug that has been around since the 1700s or earlier. Lewis and Clark took quinine with them on their expedition when they searched for the Northwest Passage in the early 1700s. They lost very few men in the years of living in the wilderness under extremely difficult, uncivilized conditions using this drug. It's an extremely safe drug with no side effects. Ivermectin has been around for four decades with a proven track record. Also safe. So please stop spewing the horse argument. Regeneron's monoclonal infusions also work..these drugs need to be given in early treatment before hospitalization becomes warranted. Your positions and those of the county health dept are not supported by science or law. By the way a mandate is not a law. Neither is an executive order. Strangely enough noone has been able to locate Biden's executive order.. how is that possible?? No EO equates to no mandates.. There are many people in our hospitals with covid who have been vaccinated. Many nurses will attest to that. Many have died with covid and not of it. Death certificates should be amended. I understand the hospitals are making out like bandits.here..Consider the state of Israel with its mandated vaccinations and its myriad hospitalizations. Most of their citizens were vaccinated. Take a look at India who has judiciously given its people the proper meds to fight this virus, and I might add at a very low price. This country is doing very well.. Big Pharna will never permit that. Money is always the bottomline. We wonder who else profits?

Many nurses and doctors are leaving this profession because they refuse to conform. What happens to the health industry here? Are you concerned about that at all? What happened to those who were suffering from cancer, diabetes, heart problems etc who were not treated in favor of covid patients? Were they not worthy? How many died as a result of denied care? Many didn't have to be hospitalized if they were initially given the proper meds. By the way what happened to the run-of-the mill flu? Seems it bowed out this past year or are many of the cases we've seen actually the flu? Would love to see that analyzed. And why would the death cert of a person who died in a motorcycle accident be classified covid? Sounds like they are bolstering the numbers which the New Times has been guilty of and admitted to.

How long is this politically motivated hoax going to be perpetrated against the American people? How many boosters are enough? How many lockdowns will there be and how many businesses will you allow to be shuttered? How many black-outs will there be on the availability of meds? Many people haven't even heard of these drugs. Why is that? You might recall we citizens were given the right to try. Is this a case of political control of the population? It would be dastardly if that were the case.

As for little children, they should never be given these vaxs. They don't need them as they have natural immunity. Please don't give us the tired reasoning that children have to have vaccines to enter school. You are arguing meds that have been around for decades and proven effective. These are experimental gene therapy drugs quite a different animal. Are you not concerned with the cases of little children committing suicide due to lockdowns and mask

mandates? Little children should never be subjected to wearing masks all day.. how is this affecting their developing brains and respiratory systems? And why is there no consideration given to those with medical or religious objections or those who have the immunity acquired by having the virus? This is so anti-American. When in our recent history has government mandated an unproven vax? The tests you want people to take are not conclusive often giving false positives. Why are masks required to enter a restaurant but are taken off to eat? What happened between the entrance and the short distance to the table? Makes no sense.

Why are firms allowed to dictate to their employees to take the job or be fired? This was never a requirement when hiring an employee. There are a number of large companies in our area complicit in this scheme. Is it a case of keeping their government contracts?

The day will come when lawsuits will be filed big time. In fact it's already happening.. I wouldn't want to be on the wrong side of this argument because you would lose legally and perhaps have to answer for your decisions. What you can do is to concentrate on prohibiting illegals from entering our state with no testing or destination clarified. That would be a huge contribution toward stopping the spread of this virus in addition to opening the county.

Citizens are becoming aware of the dangers posed by taking these drugs from Pfizer, Moderna and Johnson and Johnson. There have been 700,000 injuries thus far and tens of thousands of deaths that can be attributed to these vaxs. People healthy one day before offering their arms and deathly sick the next with diseases that will last a lifetime. I understand from the experts that 25 deaths would be enough to close down a research program. Why is this one still allowed to continue?

Do your research before making further edicts. That's your job.. Better to err on the side of caution..

I reiterate.. It's up to the individual with his God-given freedom to determine what is in his or her best interest. Have the shot or don't have the shot.. wear a mask or don't wear a mask..it's up to you, but give the person the information to determine a viable decision..that information has been hidden.. Our Constitution, the law of this land, guarantees that freedom to decide for yourself, and history further supports it with the Nuremberg Code and other US laws passed to protect the individual..I hope you would agree. No I'm not a doctor but I am a truth seeker with an investigative mind and a good dose of common sense.

I would like you to respond to the questions posed in this email.

Sincerely,

Diane Mazur

Attn: Santa Barbara County Supervisors and Doctors Ansorg and Do-Reynoso

Last board meeting Dr. Do-Reynoso stated she was not aware of any harm done by vaccines in our community. Many in our community know someone who had are still having minor to severe reactions to this treatment that is still in stage 3 trials. This makes it even harder to trust her recommendations.

This is very concerning if she has not been informed by local hospitals or doctors who have experienced these adverse reactions. How can she be expected to have an informed decision when forming health policy?

- How are local adverse reactions tracked?
- Who is responsible for medical bills and loss of income for vaccine injured?
- Will Dr Do-Reynoso commit to meeting with local community members who have been affected?
- How many adverse reactions are acceptable before these vaccine mandates will be considered unsafe?

Please consider adding Vitamin D and Natural Immunity to your Australian inspired cheese model. Also please reconsider using Australia's model as they have substantially more suicides than Covid deaths over the last few months due to extreme lockdowns.

Justin Shores
