RE: Lompoc Wind Energy Project
06CUP-00000-00009; 08VAR-00000-00003; 06EIR-00000-00004

To Whom It May Concern:

I am a strong supporter of moving our region away from fossil fuels and helping to lessen the impacts of climate change. This is why I also support energy conservation and increased efficiency, renewable energy and sustainable transportation measures.

The Lompoc Wind Energy Project is the first utility-scale renewable energy project in our county, so your handling of it will have major implications for future projects of this kind. While I have read about the likely biological and visual impacts of the project, I believe that the project's ability to provide 12% of our county's electricity demand is a major benefit to our region. The impacts from this wind power project are far less than from new natural gas, coal or nuclear plants -- and it will greatly enhance our county's energy grid reliability and our energy independence! The County will also benefit from new jobs, cost-effective power and tax revenue.

I'd like to voice my full support for the Lompoc Wind Energy Project.

Sincerely,
Katie Corliss, LEED AP

Unfortunately, I am unable to attend the December 16, 2008 hearing personally.

As a candidate for Congress in the November 4, 2008 election for the 23rd Congressional District in California, I was in contact with thousands of people in Santa Barbara County and elsewhere. Whenever the issue of wind energy came up, everyone was in favor of pursuing it. Specifically, they were also in favor of developing this locally in Lompoc. We have the ability to produce renewable, clean energy right here through private industry! This is a great benefit. I support it and extend the support of these countless residents and voters with whom I was in contact. Thank you.

Sincerely,
Matt Kokkonen

Please inform each county supervisor and Mike Brown of my strong support for the subject project at their December 16th meeting. We all talk of the need for alternate energy and when such a wonderful project comes along many hurdles emerge which delay or can end the project and NYMBY's can come on to the scene to do their obstructive work which negatively can effect our future.

I am writing to reiterate my support for this project. Despite the two appeals that have been filed, I feel strongly that this project is in the longterm best interest of the county in terms of creating a source of sustainable and renewable energy for this area. Thank you for listening.

Please continue to support this project, not only for the environmental benefits of wind power but also because our County will reach the need for renewable sources of energy in the near future.

Having a source of energy that is not dependent on an outside provider gives the County a reliable source of power not subject to outside rate changes.

It makes good business to invest in something that can have local control and has unlimited generating capabilities.

The cost of generating coal-burning power, with the associated waste disposal etc., will eventually become cost-prohibitive and it will be to the County's advantage to already have infrastructure connecting to a wind system.

Thanks for all your hard work.

Sincerely,

Stephanie Christoff, Assoc. AIA

I live in Goleta, so I'm not familiar with how much inconvenience the wind turbines would be to neighbors.

But generally, I support alternative energy. The companies funding the project gets a big piece of the profits, but then, so does the lender for my house.

Unless it's really a problem for neighbors, I hope you vote positively on the project.

Dear Supervisors,

I am a supporter of the Lompoc Wind Energy Project, which is coming up for a vote this Tuesday, the 16th. Please vote for this project to go ahead so we can begin to have clean, renewable energy in Santa Barbara County.

Please let me know that you have voted for this.

Thanks!

:) Kalia

Subject: Acciona Wind Farm Appeal

8

Dear Supervisors,

I hope that Board will deny the appeal of the Acciona Wind Farm project approval. This is an excellent project that will bring clean, renewable energy to the North County with very little downside. Acciona has done their homework in terms of noise and bird issues, and I believe the benefits of this project far outweigh the minor impacts.

To: sbcob
Subject: Lompoc Wind Energy Project

We are writing to request that the Board of Supervisors support the Lompoc Wind Energy Project and deny the two appeals that have been filed.

Santa Barbara County must remain an environmental leader by committing to make renewable energy a reality.

Santa Barbara County must move toward a clean, renewable energy, reduce our dependence on foreign sources of fuel, and help sustain coastal family ranches.

If the Board of Supervisors overturns the unanimous Planning Commission approval and accept the appeals – even after the project has been thoroughly reviewed and is subject to stringent mitigations that have set new industry standards – will send the message that Santa Barbara County is shutting the door on renewable energy projects.

With your support, Santa Barbara County will take a significant step toward a renewable energy future.

RE: Lompoc Wind Energy Project

Dear Supervisors,

The Carpinteria Valley Association supports the Lompoc Wind Energy Project proposed by Acciona Energy. Having sent a letter to the Planning Commission supporting wind energy, we believe that the supervisors should support this project also. We need to establish clean energy sources as soon as possible to eliminate our dependence on oil. We also agree with the position of the Environmental Defense Center. Please support the Acciona Lompoc Wind Energy Project.

Sincerely,
Vera Bensen
