Summer 2020: Projected Infection in LA County

As summer approaches, if physical distancing is....

... of LA County residents will have been infected over the course of the pandemic by August 1st, 2020.

Takeaways: Social distancing is working

- Current Governor's Executive Order N-33-20 issued March 19 in effect until further notice
- Local government can be more restrictive, but not less restrictive
- Current local data suggests that physical distancing and public health directives have slowed the spread of COVID-19
- Reduction in physical distancing behavior may lead to rapid increases in cases and high demand for hospital services beyond current capacity
- Staying at home and physical distancing will allow our hospital system to remain intact and to provide services to all who need that level of care
- Guidance from CDPD and discussions about the future

Coordinated Response -Access to information

The screenshot shows the website for the Santa Barbara County Public Health Department. At the top left is the logo with the text "Santa Barbara County PUBLIC Health DEPARTMENT". To the right are navigation links: "ABOUT", "PREVENTION", "FAQS", "HEALTHCARE PROFESSIONALS", "NEWS", and "RESOURCES". The main content area features a large banner with a scenic view of a coastal town. On the left side of the banner, it reads "CORONAVIRUS DISEASE 2019 (COVID-19) PUBLIC INFORMATION PORTAL". A search bar with the placeholder "Enter keyword" and a "SEARCH" button is located in the top right of the banner. Below the banner are three red buttons: "BREAKING NEWS", "DAILY STATUS REPORTS", and "PROVIDER ALERTS".
