While the media scrambles to discredit a drug that won a Nobel prize in 2015 for nearly eradicating parasitic river blindness in the third world, calling it a horse dewormer, 63 studies have shown it to have 86% effectiveness on covid.

At the same time Israel, the most vaccinated nation in the world, which wanted to be the model for how effective the vaccine could be if forced on its citizens, now has the 2nd highest covid rates and is planning its second booster! Israel has now been removed by the EU as an epidemiologically safe state and Israelis are now banned from Sweden and Portugal.
