C. CONTRACTOR can meet the DBE participation goal by either documenting commitments to DBEs to meet the AGREEMENT goal, or by documenting adequate good faith efforts to meet the AGREEMENT goal. An adequate good faith effort means that the CONTRACTOR must show that it took all necessary and reasonable steps to achieve a DBE goal that, by their scope, intensity, and appropriateness to the objective, could reasonably be expected to meet the DBE goal. If CONTRACTOR has not met the DBE goal, complete and submit Exhibit 15-H: DBE Information – Good Faith Efforts to document efforts to meet the goal. Subtask C.02: Stormwater Control Plan

The PROJECT must comply with COUNTY'S Stormwater Technical Guide based on the project Tier. It is assumed the project will be Tier 4, however the tier determination will be made at concept design through the identification of new impervious, replaced impervious, and removed impervious areas. Tier 4 projects are required to incorporate design solutions to meet the Santa Barbara County Flood Control District's storm water requirements for (1) water quality treatment, (2) peak runoff discharge rate, and (3) volume reduction for the entire project site (refer to item c below). Items a through c below must be addressed with the Preliminary Design Plans. The remaining items are need for Final Design and Construction Plans. Refer to the COUNTY's Stormwater Technical Guide for more information regarding BMP options: <https://www.countyofsb.org/2324/New-Redevelopment>.

- a. Include a grading and drainage plan that indicates where storm water from all impervious areas for the entire project site will be treated (i.e. clearly show how all hardscape within the project site

will be treated by proposed BMPs). It must be demonstrated that no runoff requiring treatment is bypassing the proposed BMPs.

- b. A hydrology/storm water report is required.
- c. To determine the project site (i.e., area where all impervious area must be tributary to proposed storm water treatment improvements), prepare an exhibit in the plan set (separate from the site plan) that identifies all proposed new, redeveloped, and removed impervious area. Also, confirm that the scale is accurately imbedded in the plan set pdf file, so it is possible to confirm the sf of each feature using the Adobe measuring tool within the pdf. For the new, redeveloped, and removed impervious areas identified on the exhibit, itemize each feature (i.e., provide the sq. ft. of every improvement individually with a call-out) and provide overall totals for each category.
- d. Infiltration of storm water is required. Consider implementing natural filtration devices, such as swale-like landscaping, other bioretention designs or permeable paving that allows infiltration of storm water into the soil for water quality treatment.
- e. Include a description of proposed storm water BMPs in the scope of work or project description section of the plan cover sheet
- f. Include the locations of all BMPs on the site plan and provide a reference to the details on the Civil sheets.
- g. Include cross-section details of all proposed BMPs that demonstrate compliance with the COUNTY's Stormwater Technical Guide.

Deliverables:

- Draft Stormwater Control Plan
- Final Stormwater Control Plan

Task D: Utility Coordination

CONSULTANT shall coordinate with all potentially affected utility companies with the PROJECT limits to ensure that all existing facilities are identified accurately during the final design phase. CONSULTANT will coordinate, prepare, and submit all utility letters on behalf of the COUNTY. This work includes, but is not limited to, researching potentially affected utilities, obtaining atlas maps, and preparing any associated maps or plans on behalf of the COUNTY. The CONSULTANT shall review preliminary utility survey and plans completed during the preliminary engineering phase for the PROJECT to verify that all affected utilities, including, but not limited to water, electric, gas, communication, storm drain, and sewer utilities have been identified in within the PROJECT limits. COUNTY staff will provide the CONSULTANT with any available information, relevant to the PROJECT, including as-builts and previous mapping completed in AutoCAD/GIS.

The CONSULTANT shall address any utility conflicts by modifying the design of the improvements or designing any required utility relocations, if the relocation is not covered by a franchise agreement. The design for any utility relocation shall conform to the standards of the utility owner. If utility relocations are necessary for the PROJECT, the CONSULTANT shall also be responsible for preparation and submittal of all required Caltrans forms and obtaining written authorization from Caltrans (E-76) to proceed with utility relocations.

Research should include both a field review/field work and review of available as-built drawings and encroachment permits for the PROJECT area. The results of this review shall be a final database of utility records indicating type of utility, owner, drawing number, and other relevant information. CONSULTANT shall also prepare a final base utilities map of the PROJECT area showing locations of all existing utilities.

1) Utility Coordination: Develop a preliminary utility database and base map indicating any major utilities including national-trunk fiber-optic telecommunications, oil lines, and (reclaimed) water lines. The CONSULTANT shall coordinate with all the affected utility companies and governmental agencies to obtain precise horizontal and vertical locations of their existing facilities. Said information shall be clearly shown and noted on the plans and taken into consideration for the final design for the PROJECT. The CONSULTANT shall keep accurate records of all correspondence with affected utility companies and governmental agency representatives.

2) Utility Location / Depth Verification: In order to significantly reduce the risk of loss of property, damage, and injury associated with contacting or cutting underground utilities, the CONSULTANT shall perform utility excavations (methodologies include potholing or Electronic Depth Verification), to confirm that the location and depth of affected utilities are correctly identified for final design and to avoid conflicts during construction. Dig Alert shall also be contacted to mark utility alignment in the field prior to any subsurface activity.

The CONSULTANT shall identify all critical utilities (if any) that should be potholed or verified via Electronic Depth Verification (conductive / inductive locating). Potholing work shall be conducted by the CONSULTANT, or

coordinated through a licensed sub-consultant whose area of specialty is potholing utilities. In certain cases, specific utility companies have noted that potholing will be conducted in-house. Subsequently, the CONSULTANT shall work with the COUNTY and individual utility owner(s) to identify which utility companies will conduct their own potholing activities.

The CONSULTANT shall determine the precise horizontal and vertical location of each utility that is potholed. This list of required potholes and the schedule to commence work shall be coordinated with the individual utility owner(s) and also shall be approved in advance by the COUNTY. The Consultant shall notify the COUNTY at least 48 hours prior to potholing utilities. Immediately after determining the precise location and depth of the utility, potholes shall be backfilled with non-shrink grout or an alternate material acceptable to the COUNTY Public Works Department.

3) The CONSULTANT shall coordinate with the COUNTY and other private service providers in regards to traffic control and staging of other field work. The CONSULTANT shall also coordinate and cooperate with the COUNTY and all affected utility companies for their design of utility and fiber relocations and possible undergrounding of overhead utilities. The CONSULTANT shall incorporate design and approval timelines needed by utilities to ensure PROJECT milestones are met.

The CONSULTANT or sub-consultant shall provide all required traffic control measures during excavation work in accordance with the latest edition of the California Manual of Uniform Traffic Control Devices.

The CONSULTANT shall submit a report listing all of the information obtained during potholing of existing utilities. The pothole information shall be shown on a map in plan and profile views. The report shall list the impact on the current 30% design and later design phases for PROJECT and recommended any necessary changes to the design if necessary. The CONSULTANT shall indicate all utility work on the plans and in the specifications. The CONSULTANT shall also provide copies of the plans in digital format if requested by the utilities.

ISLA VISTA ATP - ASSUMPTIONS AND EXCLUSIONS

PAED

1. We assume stakeholders will participate proactively throughout the course of the project and that the project will proceed uninterrupted.
2. We assume we will have access to properties around the project if necessary.
3. Project Meetings: the figure shown in the Fee Estimate is a budget figure based on the project schedule at the time of the kickoff which schedules the design to be completed in Spring of 2026.
4. County's "red lines" will be organized in a single set of redline plans for GHD's use.
5. The site will be accessible and clear of obstructions at the requested time of survey. If coordination of site access is required prior to the survey being performed, the county will provide the necessary coordination for access. The survey will take place during normal business hours.
6. We assume the county will route the plans through the various departments, such as the Building Department and the Planning Department as part of the individual reviews and that these departments will interact with county staff.
7. Lot Tie Agreement and Lot Line Adjustment efforts are excluded from this quote.
8. Legal description(s) and exhibit(s) for utility dedications/easements are excluded from this quote.
9. Sufficient survey monumentation will exist at the controlling major intersections and key locations of the underlying record maps. In the event that monumentation is incomplete or deficient, an additional expanded scope may be required.
10. The county will provide the Preliminary Title Reports for the parcels surrounding the project in accordance with our needs.
11. No effort is included for "Drainage Studies" or calculations outside of the project limits and SWMP compliance. This project focuses on roadway reconfiguration because of budget limitations.
12. County staff will lead public hearings on CEQA at the Planning Commission and/or the Board of Supervisors. We will assist the county prepared presentation.
13. County staff will complete the CEQA noticing to the Clearinghouse and locally for public review, and prepare the Notice of Determination.
14. The project assumes the project will receive a CEQA exemption determination. Preparation of an Initial Study/Mitigated Negative Declaration is excluded, as it is not anticipated.
15. The county will prepare all notices for the CEQA document review and Notice of Determination.
16. Prior to the 50% design document submittal the GHD team will present the two dimensional geometry for the project. Upon county review and approval of the geometry, modifications for subsequent submittal might require additional budget.
17. The County will provide public outreach coordination such as public notifications, scheduling and securing venue, assist with presenting. GHD will support exhibits for the meetings and fielding technical questions.
18. Effort for Rendering and visual simulations is a budget figure.

ROW & UTILITIES

19. Because we do not know property encroachment for the project design. Our right of way services are budgeting 5 property actions will be required. Additional properties will likely need additional budget.
20. We assume that the utility companies will cooperate with requests for information for our use. Budget for our utility research is based on this assumption; cooperation from the utilities companies is beyond our control.
21. Because of the nature of the work being shallow we assume significant relocations will not be necessary. Utility Relocation does not include design for "Relocation" other than the county drainage infrastructure; we assume any other relocation work will be designed by others.
22. Regarding effort for relocation of vault lids. We assume that relocation plans will require limited effort using simple call-outs in plan-view only (no profiles or potholing elevations). We envision simple grade adjustments such as adjusting water valve cans.
23. We assume utilities are under franchise rights or something similar where utility relocation costs are 100% on the subject utility owner. Utility agreements will be performed by others.

PSE

24. The project footprint is a well travel urban area where accommodations for landscaping is limited by pedestrian volumes and limited space. We assume limited landscaping "parkway" opportunities will be part of the LID's.
25. Project will be developed utilizing the County of Santa Barbara and Caltrans current standards at 65%. No update to standards will be made following this submittal.
26. Electrical design for the RRFB will be solar with no points of connection.
27. Specifications: Effort shown in the Fee Estimate is for GHD's work to create the "Technical Specification" (Caltrans-format contract) with associated appendices and combine it with the county boilerplate. Effort for proofreading the county boilerplate, is not included.
28. Erosion control plans will not be included in the plans. The preparation of Storm water Pollution Protection Plan will be included as a construction contract item and is not part of the "design".
29. Reproduction and scanning of the Construction Bid Documents will be performed by the county.
30. We assume the bid ready set will not have plan modifications beside sealing the documents by the engineer of record.
31. Design exceptions will be submitted to the State by the county.
32. Hazardous material remediation for contaminated soils, if present, is excluded.
33. Fees Schedule: Our fee schedule is based on a 2-year project duration.

B. Other Insurance Provisions

The insurance policies are to contain, or be endorsed to contain, the following provisions:

1. **Additional Insured** – COUNTY, its officers, officials, employees, agents and volunteers are to be covered as additional insureds on the CGL policy with respect to liability arising out of work or operations performed by or on behalf of the CONTRACTOR including materials, parts, or equipment furnished in connection with such work or operations. General liability coverage can be provided in the form of an endorsement to the CONTRACTOR'S insurance at least as broad as ISO Form CG 20 10 11 85 or both CG 20 10. CG 20 26, Cg 20 33 or CG 20 38; and CG 20 37 if a later revisions used).

CONTRACTOR agrees to obtain any endorsement that may be necessary to effect this waiver of subrogation, but this provision applies regardless of whether or not the COUNTY has received a waiver of subrogation endorsement from the insurer.
5. **Deductibles and Self-Insured Retention** – Self-insured retentions must be declared to and approved by the COUNTY. The COUNTY may require the CONTRACTOR to purchase coverage with a lower retention or provide proof of ability to pay losses and related investigations, claim administration, and defense expenses within the retention. The proof of insurance, certificates and endorsements are to be received and approved by the COUNTY before work commences. However, failure to obtain the required documents prior to the work beginning shall not waive the CONTRACTOR'S obligation to provide them. The CONTRACTOR shall furnish evidence of renewal of coverage throughout the term of the Agreement. The COUNTY reserves the right to require complete, certified copies of all required insurance policies, including endorsements required by these specifications, at any time.
8. **Failure to Procure Coverage** – In the event that any policy of insurance required under this Agreement does not comply with the requirements, is not procured, or is canceled and not replaced, COUNTY has the right but not the obligation or duty to terminate the Agreement. Maintenance of required insurance coverage is a material element of the Agreement and failure to maintain or renew such coverage or to provide evidence of renewal may be treated by COUNTY as a material breach of contract.
9. **Subcontractors** – CONTRACTOR shall require and verify that all subcontractors maintain insurance meeting all the requirements stated herein, and CONTRACTOR shall ensure that COUNTY is an additional insured on insurance required from subcontractors.
10. **Claims Made Policies** – If any of the required policies provide coverage on a claims-made basis:
 - i. The Retroactive Date must be shown and must be before the date of the contract or the beginning of contract work.
 - ii. Insurance must be maintained and evidence of insurance must be provided for at least five (5) years after completion of contract work.
 - iii. If coverage is canceled or non-renewed, and not replaced with another claims-made policy form with a Retroactive Date prior to the contract effective date, the CONTRACTOR must

purchase "extended reporting" coverage for a minimum of five (5) years after completion of contract work.

11. **Special Risks or Circumstances** – COUNTY reserves the right to modify these requirements, including limits, based on the nature of the risk, prior experience, insurer, coverage, or other special circumstances.

Any change requiring additional types of insurance coverage or higher coverage limits must be made by amendment to this Agreement. CONTRACTOR agrees to execute any such amendment within thirty (30) days of receipt.

Any failure, actual or alleged, on the part of COUNTY to monitor or enforce compliance with any of the insurance and indemnification requirements will not be deemed as a waiver of any rights on the part of COUNTY.

The CONTRACTOR must ensure that DBEs and other small businesses have the opportunity to participate in the performance of the work that is the subject of this solicitation and should take all necessary and reasonable steps for this assurance. The proposer must not discriminate on the basis of race, color, national origin, or sex in the award and performance of subcontracts.
- b. Proposers are encouraged to use services offered by financial institutions owned and controlled by DBEs.

3. SUBMISSION OF DBE INFORMATION

If there is a DBE goal on the contract, Exhibit 10-O1 CONTRACTOR Proposal DBE Commitment must be included in the Request for Proposal. In order for a proposer to be considered responsible and responsive, the proposer must make good faith efforts to meet the goal established for the contract. If the goal is not met, the proposer must document adequate good faith efforts. All DBE participation will be counted towards meeting the contract goal; therefore, all DBE participation shall be collected and reported.

Exhibit 10-O2 CONTRACTOR Contract DBE Information must be included in best qualified consultant's executed consultant contract. Even if no DBE participation will be reported, the successful proposer must execute and return the form.

4. DBE PARTICIPATION GENERAL INFORMATION

It is the proposer's responsibility to be fully informed regarding the requirements of 49 CFR, Part 26, and the Department's DBE program developed pursuant to the regulations. Particular attention is directed to the following:

- a. A DBE must be a small business firm defined pursuant to 13 CFR 121 and be certified through the California Unified Certification Program (CUCP).
- b. A certified DBE may participate as a prime consultant, subconsultant, joint venture partner, as a vendor of material or supplies, or as a trucking company.
- c. A DBE proposer not proposing as a joint venture with a non-DBE, will be required to document one or a combination of the following:
 - i. The proposer is a DBE and will meet the goal by performing work with its own forces.
 - ii. The proposer will meet the goal through work performed by DBE subconsultants, suppliers or trucking companies.
 - iii. The proposer, prior to proposing, made adequate good faith efforts to meet the goal.
- d. A DBE joint venture partner must be responsible for specific contract items of work or clearly defined portions thereof. Responsibility means actually performing, managing, and supervising the work with its own forces. The DBE joint venture partner must share in the capital contribution, control, management, risks and profits of the joint venture commensurate with its ownership interest.
- e. A DBE must perform a commercially useful function pursuant to 49 CFR 26.55, that is, a DBE firm must be responsible for the execution of a distinct element of the work and must carry out its responsibility by actually performing, managing and supervising the work.
- f. The proposer shall list only one subconsultant for each portion of work as defined in their proposal and all DBE subconsultants should be listed in the bid/cost proposal list of subconsultants.
- g. A prime consultant who is a certified DBE is eligible to claim all of the work in the Contract toward the DBE participation except that portion of the work to be performed by non-DBE subconsultants.

- b. Access the CUCP database from the Department of Transportation, Office of Civil Rights website.
 - i. Click on the link titled "Access the DBE Query Form"

Searches can be performed by one or more criteria. Follow instructions on the screen.

6. Materials or supplies purchased from dbes count towards the dbe goal under the following conditions:

- a. If the materials or supplies are obtained from a DBE manufacturer, count 100 percent of the cost of the materials or supplies. A DBE manufacturer is a firm that operates or maintains a factory, or establishment that produces on the premises the materials, supplies, articles, or equipment required under the Contract and of the general character described by the specifications.
- b. If the materials or supplies purchased from a DBE regular dealer, count 60 percent of the cost of the materials or supplies. A DBE regular dealer is a firm that owns, operates or maintains a store, warehouse, or other establishment in which the materials, supplies, articles or equipment of the general character described by the specifications and required under the Contract are bought, kept in stock, and regularly sold or leased to the public in the usual course of business. To be a DBE regular dealer, the firm must be an established, regular business that engages, as its principal business and under its own name, in the purchase and sale or lease of the products in question. A person may be a DBE regular dealer in such bulk items as petroleum products, steel, cement, gravel, stone or asphalt without owning, operating or maintaining a place of business provided in this section.
- c. If the person both owns and operates distribution equipment for the products, any supplementing of regular dealers' own distribution equipment shall be, by a long-term lease agreement and not an ad hoc or Agreement-by-Agreement basis. Packagers, brokers, manufacturers' representatives, or other persons who arrange or expedite transactions are not DBE regular dealers within the meaning of this section.
- d. Materials or supplies purchased from a DBE, which is neither a manufacturer nor a regular dealer, will be limited to the entire amount of fees or commissions charged for assistance in the procurement of the materials and supplies, or fees or transportation charges for the delivery of materials or supplies required on the job site, provided the fees are reasonable and not excessive as compared with fees charged for similar services.

Staffing

TEAM QUALIFICATIONS AND COMMITMENT TO SANTA BARBARA COUNTY'S SUCCESS

GHD's engineers, architects, planners, and scientists are committed to creating solutions that provide lasting community benefit no matter where they are working. For the Isla Vista project, however, our team is even more invested. Santa Barbara is our home, our family's home, our significant others', and children's alma mater; it's a community close to our hearts and our families. Our project manager, Tom Conti, raised his family here, and currently lives in the county. Our project director, Lindsey Van Parys, spent every summer here at her aunt's home during her youth and now enjoys bringing her son here every year to share the memories she created

with him in Santa Barbara as well. Chenin visits the area consistently with family residing in the city. This is more than a project for us—it's an opportunity to have a large positive effect on a place we love, a place we call home.

ORGANIZATIONAL CHART

The organizational chart below shows our proposed team, indicating roles and hierarchy so that it is clear to all involved how work is communicated, from subconsultants through our project manager and Quality Assurance/Quality Control (QA/QC), and to the County. The organizational chart highlights key personnel as well as discipline leads. We also will leverage our large network of additional resources and support staff to deliver a quality project within budget and on schedule to help the County achieve its goals.
