Subject: STOP the Hoop Houses surrounding our neighborhood

Last week you stated that there had been no complaints opposing the Hoop Houses in the Santa Maria Valley. We are writing to inform you that we, along with numerous other residents in our community, do in fact oppose the Hoop Houses and your assessment of them.

We live in the Lake Marie subdivision and have been informed that the agricultural community is installing the Hoop Houses all around us. Currently they are planning to cover 60 acres in the neighboring area right behind and around our homes. It has been stated that they will only stay up for 6 months but we feel that is untrue because we see them all year around. This will destroy our property values and the rural living that we are accustomed to.

The Lake Marie residents had a meeting last week and some of us had no knowledge as to the potential problems that would come from this. We urge the board of Supervisors to please stop the rapid growth of these plastic hoops that now cover the surrounding Lake Marie area and the Santa Maria Valley .

Sincerely,

Joshua and Michele Motta

Dear Supervisor Wolff:

Last week Supervisor Adam, stated that no one opposes Hoop Houses in the Santa Maria Valley. That is not true lots of people including myself are talking about this and do not agree with your assessment.

We live in the Lake Marie subdivision and they are erecting the Hoop Houses all around us. Currently they are planning to cover 60 acres right behind our homes. They say that they will only stay up for 6 months but that is not true because we see them all year around. This will destroy our property values and the rural living that we are accustomed too. Having these hoop houses also requires lots of people to work in them and the impact will be severe to all who live here.

The Lake Marie residents had a meeting last week and some of us had no knowledge as to the potential problems that would come along with this, (ie) height, devaluation of properties, noise pollution etc; etc. We urge the board of Supervisors to please stop the rapid growth of these plastic hoops that now cover the Santa Maria Valley.

Sincerely,

Gerald Charette
Yolanda Charette

To all supervisors,

November 9 2015

Last week Mr. Adam, our supervisor wrote an opinion in the Santa Maria times regarding the Hoop Houses. He stated that no one opposes this in the Santa Maria Valley. That is not true lots of people including myself are talking about this and do not agree with his assessment.

Before this issue came up on the board of supervisors I tried several times to make an appointment with the office of Mr. Adam, with no success, to talk about the rapid growth of the plastic covered Santa Maria Valley.

We live in the Lake Marie subdivision and they are erecting the Hoop Houses all around us. Currently they are planning to cover 60 acres right behind our homes. They say that they will only stay up for 6 months but that is not true because we see them all year around. This will destroy our property values and the rural living that we are accustomed too. Having these hoop houses also requires lots of people to work in them and the impact will be severe to all who live here.

We urge the board of Supervisors to limit the height and the amount of structures that can be placed right next to neighborhoods.

Sincerely,

Berto van Veen
