Subject: I support the Gaviota Coast Plan

Hello Board of Supervisors,

Please accept all the Commission's modifications on October 16th to allow the Gaviota Coast Plan to take effect in the Coastal Zone as soon as possible.

The Gaviota Coast Plan is a critically important tool reflecting a vision to protect and enhance this extraordinary stretch of coastline into the future, and must be fully implemented in the Coastal Zone.

The Coastal Commission worked diligently with the County to address concerns over the suggested modifications, and made significant concessions to help resolve the County's concerns including concerns raised by Gaviota Coast farmers and ranchers.

As modified, the Gaviota Coast Plan requires less permitting for ongoing agricultural operations than the County's existing certified Local Coastal Program, fitting the needs of farmers and ranchers better than the rules currently on the books, while ensuring that the Gaviota Coast's sensitive habitats are protected.

Sincerely,

Elizabeth LaBarre

Lifetime resident of California

Subject: Gaviota Coast Plan

Dear Supervisors,

I am unable to attend this Tuesday's Board meeting, so I am writing to urge you to finalize the Gaviota Coast Plan in the Coastal Zone. As you know, the Plan is the culmination of countless meetings and years of cooperative and sometimes contentious work. Matters of concern to farmers and ranchers have been addressed in it and while not perfect, this document is far better than the existing Local Coastal Plan. Crucially, the Gaviota Coast Plan implements safeguards for environmental elements, the crux of region's uniqueness. It is imperative that all 13 of the suggested modifications be approved, or we will be stuck with the old, inadequate LCP which serves the needs of neither ranchers nor sensitive habitat. The Gaviota Coast Plan sets the future for this incomparable coastline, and by adopting this as the final version, its preservation for future generations will be much more secure.

Thank you,

Deane Plaister

- The Gaviota Coast Plan is a critically important tool reflecting a vision to protect and enhance this extraordinary stretch of coastline into the future, and must be fully implemented in the Coastal Zone.
- The Coastal Commission worked diligently with the County to address concerns over the suggested modifications, and made significant concessions to help resolve the County's concerns including concerns raised by Gaviota Coast farmers and ranchers.
- As modified, the Gaviota Coast Plan requires less permitting for ongoing agricultural operations than the County's existing certified Local Coastal Program, fitting the needs of farmers and ranchers better than the rules currently on the books, while ensuring that the Gaviota Coast's sensitive habitats are protected.
- If the County rejects or fails to accept all 13 suggested modifications to the Gaviota Coast Plan, the outdated 1982 Local Coastal Program will continue to apply, disadvantaging the environment including agriculture, and squandering years of time, effort, and financial resources.
- The Board of Supervisors should accept all the Commission's modifications on October 16th, to allow the Gaviota Coast Plan to take effect in the Coastal Zone as soon as possible.

Subject: The Gaviota Coast

Every Time I travel the Gaviota Coast, my blood pressure drops, my nerves untangle, and my aged bones relax. My view of the world around me expands and I see and feel the beauty and power of this precious part of the California Coast. In any season, any weather, up coast or down, day or night, I have never in (most of) my 91 years failed to send a thank you thought to those who have worked so hard to preserve this unique treasure. Please, I beg you, adopt the GOP and all 13 modifications so that my great-grand children, all children, can continue learning about this treasure and protect it in their turn.

Most Sincerely, Lila Anne Bartz
