Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Regards,
Lisa August-Schmidt

Dear of the Board Clerk,

I understand, by looking at the agenda for your Tuesday, October 15th meeting, that there will be a vote to oppose the expansion of gas and oil and fracking in Santa Barbara County. And I want you to know that I applaud your opposition, and thank you for taking a stand to keep Santa Barbara County a safe and beautiful place to live.

Absolutely vote NO! No drilling! No fracking!

"The largest earthquake ever recorded in Kansas—a 4.9 magnitude temblor that struck northeast of Milan on Nov. 12, 2014—has been officially linked to wastewater injection into deep underground wells, according to new research from the U.S. Geological Survey (USGS).

The epicenter of that extremely rare earthquake struck near a known fracking operation."
<https://tinyurl.com/yxbh2yv7>

"1.2 Million Litres and still leaking – Cold Lake, Alberta, Canada"

<https://you.leadnow.ca/petitions/save-cold-lake-from-out-of-control-oil-sands-fracking>

Dec. 2014 - New York Gov. Andrew Cuomo (D) will ban hydraulic fracturing, also known as fracking, in his state.

"In his remarks at the conference, Cuomo lamented the emotionally charged nature of the debate over fracking, a process that uses a high-pressure blast of water, sand and chemicals to tap into natural gas reserves contained in shale formations. "Let's bring the emotion down and let's ask the qualified experts," said Cuomo, who quickly turned the press conference over to state health and environmental officials.

The officials said the potential health and environmental impacts are too great to allow fracking to proceed in the state at this time, and pointed to a dearth of studies regarding the long-term safety of hydraulic fracturing.

The New York State Department of Environmental Conservation will issue a legally binding, supplemental environmental impact statement next year outlining its findings on the issue. The potential adverse impacts of fracking are "widespread," DEC Commissioner Joseph Martens said at the press conference. He added that the prospects for fracking in New York are "uncertain at best," and the economic benefits are 'far lower than originally forecasted.'"

Take these scientific studies on the adverse impacts of fracking seriously!

Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Regards,
Deborah Williams

Dear of the Board Clerk,

Very, very soon, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

This is a travesty, a tragedy, and a disaster waiting to happen.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Stop this nonsense! Oppose this lease!

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Regards,
Stephen Ferry

Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Regards,
Mac Duncan

Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Regards,
Jessica Avrutin

Subject: Support for the Resolution Opposing the Leasing of Federal Public Lands In Santa Barbara County for

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Regards,
Rudi Lion

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Regards,
Chris Chapman

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Dear of the Board Clerk,

I am greatly concerned about the prospect of new oil drilling and fracking on public land in Santa Barbara. The US Bureau of Land Management (BLM) is expected soon to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region. Such development would present a great threat in many ways to the ecology and recreational opportunities that these public lands afford.

I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Regards,
Susan Shields

Dear of the Board Clerk,

Any day now, the US Bureau of Land Management (BLM) is expected to finalize its plan to open 122,000 acres across Santa Barbara County to leasing for new oil drilling and fracking as part of its Resource Management Plan for the Bakersfield Region.

Included in the plan are parcels like those near Lake Cachuma, Ken Adam Park in Lompoc, and the headwaters of Nojoqui Creek where oil development—including fracking—would threaten the water supply for well over 100,000 residents of Santa Barbara, the Santa Ynez Valley, and Lompoc. Also included are parcels adjacent to parks and other areas that are important for recreation, tourism, and wildlife protection such as Jalama Beach, Los Padres National Forest, Drum Canyon, and Purisima Hills. Several of the parcels are on or adjacent to school property, where oil development would jeopardize the health and safety of children.

Additionally, the BLM's proposal conflicts with the County's Energy and Climate Action Plan and will intensify local greenhouse gas emissions which are already on the rise.

For these reasons, I urge you to take action to protect Santa Barbara County's water, air, public health, and economy by passing a resolution to oppose the leasing of federal public lands In Santa Barbara County for oil and gas development.

Regards,
