

# NOTICE OF EXEMPTION

**TO: Santa Barbara County Clerk of the Board of Supervisors**

**FROM: Department of Public Works/Transportation Division**  
(Lead Department/Division)

Based on a preliminary review of the project the following activity is determined to be exempt from further environmental review requirements of the California Environmental Quality Act (CEQA) of 1970 (Pub. Res. Code Section 21000 et seq.), as defined in the State CEQA Guidelines and County Revised CEQA Guidelines.

**APN(s) Right of Way. Project No. N/A**

**LOCATION:** Rincon Hill Road in the First Supervisorial District

**PROJECT TITLE:** Rincon Hill Road Bridge No. 51C-0039 Seismic Gate Project

**PROJECT DESCRIPTION:** This project will retrofit the existing Rincon Hill Road with a seismic gate system, including the installation of two 22 foot long motorized gate arms, flashing beacons and illuminated warning signs at both approaches to Bridge No. 51C-0039. These warning gates are lowered only when both the bridge mounted and free field sensors record a pre-determined acceleration magnitude. Control cabinets will be constructed near the bridge to house additional elements of the system, including back-up battery system and a telephone link to alert the County of Santa Barbara Public Works Department when the system has been activated. In addition to these items, some minor improvements will be constructed to protect the proposed installations and provide adequate turn-around width in advance of the seismic gate arms. This exemption considers all further administrative activities for this project.

Name of Public Agency Approving Project: County of Santa Barbara

Name of Person or Agency Carrying Out Project: Public Works Transportation Division

**Exempt Status: (Check one)**

- Ministerial
- Statutory Exemption
- Categorical Exemption 15301(c)
- Emergency Project
- Categorical Exemption 15301(f)
- Declared Emergency

**Cite specific CEQA and/or CEQA Guideline Section:** 15301(c) Existing Facilities – Class 1 consists of the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that existing at the time of the lead agency’s determination. The types of “existing facilities“, itemized below are not intended to be all inclusive of the types of projects which might fall within Class 1. The key consideration is whether the project involves negligible or no expansion of an existing use. Examples include but are not limited to: (c) Existing highways and streets, sidewalks, gutters, bicycle and pedestrian trails, and similar facilities (this includes road grading for the purpose of public safety).

15301 (f) Addition of safety or health protection devices for use during construction of or in conjunction with existing structures, facilities, or mechanical equipment, or topographical features including navigational devices;

**Reasons to support exemption findings:** Consistent with this exemption, this proposed project involves an activity related to the seismic safety repair to an existing road facility. The project allows for a public safety activities designed to increase the safety of traveling public in vehicles crossing a public bridge in the event of an earthquake. Further, there are no unusual circumstances which would create a possibility that there would be a significant effect. Therefore, this project can be found to be categorically exempt from CEQA.

There is no substantial evidence that there are unusual circumstances (including future activities) resulting in (or which might reasonably result in) significant impacts which threaten the environment. The exceptions to the categorical exemptions pursuant to Section 15300.2 of the State CEQA Guidelines are:

- (a) **Location. Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located -- a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies.**

CEQA Guidelines Section 15301 is a Class 1 exemption; therefore, this exception does not apply.

- (b) **Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.**

The project involves the seismic repair and maintenance of an existing road and bridge to improve public safety. In addition, there are no other identified projects which would contribute to cumulative impacts. Therefore, this exception does not apply.

- (c) **Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.**

The project involves seismic repair to maintain a safety for the traveling public over a bridge in the event of an earthquake. The project will occur where no sensitive resources are located. Therefore, this exception does not apply.

- (d) **Scenic Highways. A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway. This does not apply to**

**improvements which are required as mitigation by an adopted negative declaration or certified EIR.**

The project does not involve a scenic highway or a project which may result in damage to a scenic resource, removal of trees, rock outcropping or similar resource. Therefore, this exception does not apply.

- (e) **Hazardous Waste Sites. A categorical exemption shall not be used for a project located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code.**

There are no hazardous wastes site locations in the residential roadway right of way. Therefore, this exception does not apply.

- (f) **Historical Resources. A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource.**

The project as proposed will have no adverse effect on the bridge. A Historical Resources Evaluation Report was not required for the Rincon Hill Road Bridge since an evaluation was completed for the 2006 Statewide Inventory. As currently proposed the project will not impact any character-defining features of the property. Therefore, this exception does not apply.
