PATIENT PORTAL STATEMENT OF WORK

Purpose:

- Document the roles and responsibilities of the GE and Santa Barbara County Public Health Department's (SBCPHD)'s project teams.
- Document the high-level approach and milestones.
- Document the timeline for the project.

Product Description

Centricity EMR Patient Portal will allow SBCPHD patients to view online, download and transmit their health information and access clinical summaries for each office visit. It will also integrate with the necessary infrastructure so patients and their care providers can securely message with each other. SBCPHD will purchase 200 concurrent licenses, annual maintenance, installation and training from GE Healthcare.

Implementation Approach

Implementation: SBCPHD will purchase the GE Centricity Patient Portal concurrent software licenses and annual maintenance on this contract. The department will also work with GE professional services to install the Patient Portal in a test computing environment and conduct site testing. In addition, GE professional services will be used to integrate the Patient Portal to GE Centricity EMR and Secure Messenger.

Training: GE will conduct technical training and knowledge transfer with the SPCPHD IT technical team so they are able to provide ongoing support of the Patient Portal and the Secure Messaging technical environments. GE professional services will also provide introductory training for the eForms tool and for patient portal content editing.

The SBCPHD plans to work with third party consultants to develop and implement the customized portal content including the look and feel of the web interfaces (i.e. "Skinning"), portal navigation, and the development of customized workflows.
