Subject: RE: Parkhill Estates v.2

Dear Chair Farr & Supervisors,

While our understanding was that the Board was past the biology issue after the May 1 hearing, I remind you the county Biologist, Melissa Mooney, said at the PC in conclusion:

“In addition to those two reports, I have been on the project 5 times in Spring, summer and winter; the last time I was there was Spring in 2011, I was there in March and April. I have also been to the mitigation site.

It is my professional opinion that through the surveys Mark De la Garza has prepared in conjunction with the surveys that I have done, that the surveys referred to in the initial study are adequate from a CEQA prospective.

We once again incorporate into the record all proceedings before the PC and applicant submittals & matters in the files in this case.

Thank you.

Jeff Nelson
