Supervisors:

I live in Goleta. I am appalled that you would be considering a change in the plan to reduce GHG emissions by 50% by 2030, to one that would only reduce GHG emissions in unincorporated areas by 40% by 2030. WHY do that? We need the strongest reductions possible to save us from catastrophe. Not weaker plans!! We all share the same atmospheric air. Ventura county was the fastest warming county in the country last year, and we are right next door, so the same probably applies to us. Please keep the plan at a 50% reduction of GHG by 2030.

Thank you,

Bill Woodbridge
