Subject: RE: CWA Santa Barbara county

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Working with the CWA in place keeps Our skilled and trained workers the ability to be working in their community. Outside contractors come into the community with there own workforce usually unskilled labor to work on projects taking more time to get the job done and over budget. Our members that live in the area have to drive to Los Angeles for work when there is no work in the area available but they still do their spending in their community, outside labor takes their money earned back to their own community. Skilled and trained Union workforce on a CWA guarantees the job will be built with the highest standards all around. Please consider a "YES" vote for a CWA in Santa Barbara. Thank You,

Randy Wetmur
