BOARD OF SUPERVISORS PRESENTATION JANUARY 28, 2020

My name is Harold Hill, I am a retired civil engineer living in Santa Barbara

I am here in support of the Strauss Wind Project

- As you may know, this is the only suitable large-scale wind project site in Santa Barbara County
- This is a significant renewable energy project that would double renewable energy generation in Santa Barbara County
- This project is important to help Santa Barbara County reach its renewable energy goals
- This project is also important to help California reach its 100% renewable energy goal
- The project proponent would start construction of the project soon, so it has near term benefits.

I urge you to vote to approve the Strauss Wind Energy Project!
