Subject: Agenda-July 29,2014

To: Mike Ghizzoni, Supervisors Adam, Lavagnino, Carbajal, Wolf, Farr:

It is with regret that I feel I must communicate with you my feelings on the Measure P item on the agenda for the special meeting being held July 29, 2014. I had hoped we would not be put in a position causing us to deal with a very unsavory and harmful measure in the eyes of mineral/royalty owners who feel their rights as a citizen and property owner have been threatened.

I ask you to think long and hard about letting this measure continue by making exceptions within your power. The mineral interests in my family have been passed down for generations. I do not feel it is fair to take away what is rightfully ours by limiting or stopping oil production on property which has been separated from the surface. It is a beautiful sight to see men at work bringing to America what we still need, OIL! Let the new methods and new technology methods continue. Leave well enough alone. Your actions can help deter those that keep the "pots boiling".

Because of the Measure P, a great number of mineral/royalty owners, for the first time in Santa Barbara history are now coming together to create a strong force. We did not want this to occur, but we have no choice. It is a sad time in the lives of American who now have little control over what we have worked for and acquired through the blood, sweat and tears of our parents and grandparents. All of this because of special interest groups who are treading on our territory. If Measure P passes and limits all high intensive petroleum operations, it will be a very sad time in Santa Barbara County.

Please consider the ramifications of what could happen in this county economically if you do not specify what "high intensive petroleum operations" entails and make exceptions.

Sincerely and respectfully,

Janice Barca Battles
