The term “jurisdiction” in the FRP is synonymous with “Partner City/Cities” in this document.

1. Purpose of this MOU

Under this MOU, the Partner Cities commit to sharing the cost with the County for developing a regional FRP. Attachment 1, as attached and incorporated herein, describes goal of the FRP and the Scope of Work of the FRP to be performed by the County (Attachment 1, A) and by the Partner Cities (also referred to as jurisdictions in Attachment 1, B).

Santa Barbara County Regional SB 1383 Food Recovery Plan

Proposal Completed By:

Santa Barbara County, Resource Recovery and Waste Management Division

October 2021

Introduction

The Resource Recovery and Waste Management Division (RRWMD) of Santa Barbara County Public Works is proposing to lead the development of a regional edible food recovery network to meet the compliance mandates of California Senate Bill 1383 (SB 1383). RRWMD has been working with local jurisdictions to refine the needs of our region to maximize edible food recovery. This proposal attempts to meet these needs in the purview of meeting the SB 1383 food recovery requirements. This proposal is also being created with the intention to support local non-profits in the process of achieving compliance with SB 1383. The County's goal is to direct the network, assist with tasks related to food recovery organizations and services, and provide tools to jurisdictions to have a cohesive food recovery program throughout Santa Barbara County as a whole.

This Scope of Work describes the tasks that will be completed by the RRWMD to aid in SB 1383 compliance. Please see **Attachment A** for a detailed list of tasks.

Please note that the word "County" in this document refers to the Resource Recovery and Waste Management Division and is used synonymously with "COSB" and "RRWMD." Additionally, "non-profit," "food recovery organization," and "food recovery service," are also used synonymously throughout this document.

Proposal Goals

Food recovery programs include participants from the non-profit, commercial, and local government sectors. This proposal is focused on assisting non-profit and local government partners. The goal of this proposal is to create tools and resources for a cohesive network that supports current operations at local non-profits and their growth. Food recovery compliance is dependent on current food recovery initiatives, and this proposal aims to ease and expedite the work of non-profits in our network.

Additionally, through this network, The County in coordination with the local Cities, can create and distribute uniform outreach and recordkeeping tools that streamline reporting and the collection of data needed for compliance with SB 1383. Standardized documents also help others recognize our network

and build familiarity. Consistency can help commercial businesses and non-profits that operate beyond jurisdictional boundaries.

Scope of Work Limits

This proposal does not include generator outreach, enforcement, or reporting for individual jurisdictions. The RRWMD will not complete further data collection outside of what is provided by the recordkeeping tools. However, this proposal does include tools to assist in these areas.

It is the jurisdictions' responsibility to reach out to generators or food recovery organizations or services if further data collection is needed to complete reporting requirements. RRWMD will not be responsible for gathering their individual data if they choose to not utilize the tools that we provide them.

The RRWMD also recognizes that there are current reporting partnerships with the County of Santa Barbara and some cities. The RRWMD will not be responsible for food recovery data collection for these cities. Cities will be required to send any data to the RRWMD for reporting that is not readily available from the food recovery tools.

This proposal is limited to the tasks in **Attachment A**. Any other food recovery tasks must be completed by individual jurisdictions.

Proposal Commitments

In order to meet these goals, various tasks are defined. Please see **Attachment A** for a detailed list of tasks that the RRWMD is proposing to complete in this scope of work.

RRWMD also proposes that, by joining this agreement, all jurisdictions adopt this collaborative food recovery program to be named the "Santa Barbara County Regional SB 1383 Food Recovery Plan." By joining this agreement, the jurisdictions also agree to complete the tasks in **Attachment B** to contribute to the inter-jurisdictional network.

Current Information

The 21 food recovery organizations listed as priority recipients in this scope were identified in the Needs and Capacity Assessment completed by the Community Environmental Council. The data sheet titled

“Nonprofit Survey Responses” is included as **Attachment D**, and the 21 locations identified here are highlighted in red.

Project Schedule

The Santa Barbara County Regional SB 1383 Food Recovery Plan is proposed to start as soon as all jurisdictions commit to the project in writing agreeing to the terms of this scope of work, and will remain in effect for 12 months after that date. The Food Recovery Plan progress will be reassessed in the summer months of 2022. Further food recovery implementation plans will be drafted at that time.

Costs and Next Steps

Network costs were calculated by determining the number of hours that each task would take. Each task was then multiplied by the rate of the respective staff member who would be completing the task. Lastly, the cost for 150 FileMaker licenses, at \$11.00 per license, was added to this total. The total cost was divided by each jurisdiction's population. Jurisdictions will be invoiced by the RRWMD.

Please see **Attachment E** for a detailed breakdown of the RRWMD's hourly commitment. See **Attachment F** for total project costs.

Jurisdictions will be asked to sign an individual MOU. Monthly meetings will begin in November 2021.

The RRWMD hopes to foster a sense of collaboration through this network. We hope that there are multiple opportunities to combine resources and staff time to reach food recovery goals together.

Attachment B: Jurisdiction Tasks

Items highlighted in yellow are a requirement of SB 1383.

Task	Details	Recommended Next Steps
Tier 1 and Tier 2 Generator Outreach	Jurisdiction will need to train generators on recordkeeping software.	Send letters to all generators ASAP. Use templates and include flyers.
	Each jurisdiction will need to educate their generators about SB 1383 regulations. Jurisdiction may already be doing outreach for food scraps.	Add food recovery conversation to all current outreach being done.
	Jurisdictions will need to solidify their Tier 1/2 lists. Remove any generators that are not fitting or were maybe wrongly identified.	Go through every generator and note if they are a Tier 1 or 2, and if they are a priority. Jurisdictions need to have their own discretion on these businesses.
Capacity Planning	This is already led by the County, but each jurisdiction will need to complete their own calculations.	Use the calculation provided in the Needs and Capacity Assessment to calculate the estimated amount of edible food disposed of by each generator. Keep a record of this number. COSB will send out an official request for this number in early 2022.
	Keep a record of capacity from non-profits. Use this number to determine if more capacity is needed.	
Individual reporting	All jurisdictions will be responsible for their own reporting.	Reporting data should be collected by July 1 each year.
	Jurisdictions will need to collect records from their donors.	Jurisdictions should include this in their education for generators.
Compliance enforcement	Jurisdictions will be responsible for compliance enforcement and making sure all food recovery compliance measures are met outside of this proposal.	Jurisdiction will use this information to aid in enforcement.
Website Updates	Under SB 1383 each jurisdiction is required to keep an updated list of food donor recipients, guidelines for generators, etc. This must be posted online.	SB 1383 information has already been posted on LessIsMore.org. Jurisdictions can use that text.

	SB 1383 also requires yearly educational campaigns that each jurisdiction must do. Outreach materials would be shared between jurisdictions.	
Assistance with outreach to Local Education Agencies	There are various other standards that schools must comply with, so help with SB 1383 compliance should be added to this. Again, outreach materials for schools will be included in outreach material provided by the County.	Continue outreach that is already being done in schools. Add outreach for SB 1383.
Assistance with outreach to Non-Local Entities	Teamwork will be needed to figure out the landscape of non-local entities. The County is taking the initiative, and jurisdictions may be requested to help if needed.	
Mandatory participation in Food Recovery Meetings	Participate in meetings, keep communication open with RRWMD, be available for meetings with food recovery organizations, and have open communication with non-profits.	
Sharing Resources with Food Recovery Group	Resources like StoryMaps, staff time, knowledge sharing, etc. should be shared amongst jurisdictions, as needed.
