

# SB 567: A Clean Energy Pilot Program

Supervisor Laura Capps  
Santa Barbara County  
October 21, 2025

# SB 567 (Limon): What is it?

- Pilot program to convert up to **250 idle oil & gas wells into gravity-based energy storage sites.**
- Uses mechanical systems to raise and lower weights inside the well to store and release renewable energy.
- Suitable locations are in **oil-rich areas with a high concentration of idle wells.**

## What's the impact?

- A **sustainable** use for idle wells, **reduces liability**, and supports **grid reliability.**
- Transforms idle and orphaned wells from environmental risks into **clean energy assets.**
