**Subject:** Deny Exxon trucking project - Upcoming Board of Supervisors Meeting

Caution: This email originated from a source outside of the County of Santa Barbara. Do not click links or open attachments unless you verify the sender and know the content is safe.

Dear Santa Barbara County Board of Supervisors,

THANKS FOR PROTECTING SB COUNTY! THESE PEOPLE DON'T CARE ABOUT IT BUT WE DO!

I urge you to deny this dangerous project as recommended by the Santa Barbara Planning Commission.

In addition to the significant and unavoidable risks of spills from trucking the oil, the purported benefit of producing oil from the offshore platforms and processing it on the Gaviota coast would bring with it unacceptable risks of offshore oil spills, air pollution and toxic fire and smoke risks that were not analyzed in the EIR, which focused narrowly on trucking impacts.

The recent oil spill off of Orange County underlines the severity of these risks. In addition, ExxonMobil's facilities were the largest sources of air pollution in the county and contained dangerous and toxic materials in an area that has burned by wildfire twice in the 6 years since the facilities have been shut down. We were fortunate that oil and dangerous gases were not present at the site during the recent Alisal fire, which burned onto ExxonMobil's property.

It is not just that the trucking routes are along sections of road with above average accident rates, there have been specific and recent instances of oil tankers on this route spilling oil into rivers and starting fires. In fact, on October 11 -- the same day as the Alisal fire -- an oil tanker crash near Orcutt caused a fire in Eucalyptus trees.

Thank you for denying this dangerous and unacceptable oil trucking project.

Sincerely,

Sherrill Futrell

**Subject:** Support fossil-free new buildings for Santa Barbara County!

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Dear County of Santa Barbara,

I support taking climate action and making new buildings sustainable and carbon-free!

New all-electric buildings will improve people's health by reducing toxic air pollution; combat climate change by reducing greenhouse gas emissions; and improve housing affordability by saving construction costs and lowering utility bills.

A study for the LA Dept of Water and Power finds that "all-electric new construction results in savings of \$130-\$540 per year relative to a gas-fueled home over the life of the equipment."

All-electric buildings are less expensive to build and less expensive and healthier to live in.

Thank you for maintaining Santa Barbara County's environmental leadership.

Sincerely,

ADAM BERNSTEIN
