September 8, 2015

Dear Mr. Sneddon,

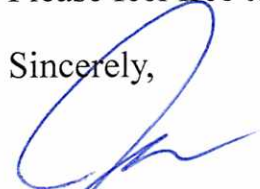

The Creekside Homeowner's Association appreciates the hard work and support your department has provided in securing the funding for the development of the Union Valley Parkway Barrier Wall Project. We believe this to be the final component for completion of the Union Valley Parkway Interchange Project, and an integral element that was sorely missing from the original project description.

The barrier wall will offer a physical, visual, and noise barrier for the community, and is essential to help protect the health and safety of many residents within the Orcutt community.

The Creekside Homeowner's Association is committed to participating in the Project to the extent that is necessary to facilitate the construction and maintenance of the barrier wall. We welcome the opportunity to make an agreement with all jurisdictions to accept ownership and maintenance of the wall and any excess land upon completion of the construction.

Please feel free to contact me if you have any other questions or concerns.

Sincerely,

Joseph S. Kasper
President
