Subject: lets preserve

I support the Goleta Beach 2.0 project which will protect Goleta Beach Park in an environmentally responsible way. The project will add an acre of sandy beach to Goleta Beach Park, which will be open for public recreation, such as bird watching, beach parties, sun-tanning, and sand castle building.

Goleta Beach 2.0 maintains protections for the restaurant, while enhancing safe access for bikes, pedestrians, and autos, offering a new MTD bus stop, and providing overflow parking.

The project follows the advice of the Coastal Commission, which has ultimate approval authority.

1.) Dear Sir/Madame

If you love this beautiful town of Santa Barbara, and have enjoyed its natural surroundings, I implore you to protect our Naples coastline from any development for private buildings or homes. It is one of the last stretches of natural, untouched, luckily minimally built upon coastlines in this gorgeous state of California. Please, please , pleeeeee stop these "out of towners" from ruining the land we all love and need. It's not just about the people, its the animals, seals, birds, flowers, everything that uses that land to live and thrive on. Lets preserve that land for ever!!!

Thank you, please let me know what else we and you can do to further protect our gem of a coastline.

Sincerely,
Dallas Folks
