Why the JPA?

- Acting jointly with members to increase cost efficiency in administration. Rather than individual counties complying with reporting requirements, this task could be centralized, resulting in cost avoidance
- Leverage CalMHSA as a hub to develop multiple requests for proposals and contracts with providers. The JPA facilitates the efficient use of member and provider resources to accomplish the agreed upon goals
- Negotiate cost effective rates with various subcontractors statewide and greatly reduce the cost of overhead administration
- Serve as a repository to house, share and disseminate research, information and specific strategies that are the most effective and quality assured
- Evaluate and analyze potential statewide and regional efforts for systematic results
- Provide members with an alternative to the assignment of county MHSAs funds to the state department and state legislature to implement state and regional MHSAs projects
