COASTAL RESOURCES MITIGATION FUND GUIDELINES

1. PURPOSE OF THE COASTAL RESOURCES MITIGATION FUND

Environmental impact reports for five oil projects concluded that Santa Barbara County's coastal resources will be adversely affected by the impacts of offshore oil and gas development along or near the County's coast. Permit conditions for these County-approved offshore oil and gas projects, Point Arguello, Santa Ynez Unit, Point Pedernales, Gaviota Terminal, and Molino Gas require each project to contribute to the Coastal Resources Mitigation Fund (CRMF) (previously known as "*Coastal Resources Enhancement Fund*", "*CREF*", and "*FUND*"). The permit conditions specify that for the Santa Ynez Unit and Point Arguello projects, the contribution to CRMF shall not exceed \$327,400 annually for the life of the project. For Gaviota Terminal and Point Pedernales projects, the contribution to CRMF shall not exceed \$325,000. The Molino Gas project's permit requires a CRMF payment of \$71,880 (in 1997 dollars) every year while the drilling rig is erected for primary drilling operations and \$17,970 (in 1997 dollars) every quarter for well workovers and abandonment procedures.

The purpose of CRMF is to provide the required mitigation for these residual and cumulative impacts that cannot be fully mitigated by other project-specific mitigation measures. CRMF is designed specifically to mitigate, to the maximum extent feasible, impacts to coastal recreation, aesthetics, tourism, and/or sensitive environmental resources. CRMF achieves mitigation by providing enhancement projects, which will compensate for the residual impacts to the County caused by these oil and gas projects that are not fully mitigated by other project-specific mitigation measures. Any future offshore oil and gas projects permitted by Santa Barbara County would be expected to participate in the CRMF program consistent with the adopted guidelines.

1.1 Coastal Resources Mitigation Fund Program Approved by the Board of Supervisors

On April 18, 1988 the Board of Supervisors approved a funding approach for implementing CRMF. This approach requires four of the five affected offshore oil projects (Point Arguello, Santa Ynez Unit, Point Pedernales, and the Gaviota Terminal), to make either a front-end, five-year payment to CRMF or to make annual payments for the next five years. CRMF payments required of these projects for each five-year period are reassessed by the Board of Supervisors. The results of the past reassessments are in Table 1.

The County specified CRMF fees for the Molino Gas project in the permit, rather than resorting to five-year assessments, due to state law effective for mitigation fees approved after January 1, 1989. The Molino Gas project has paid \$71,880 to CRMF (known as "*CREF*" and "*FUND*" at that time) in 1997 and \$21,025 when it plugged and abandoned its sole exploratory well in 2003.

Table 1. Approved Coastal Resources Mitigation Fund Payments

	Santa Ynez Unit	Point Arguello	Gaviota Terminal	Point Pedernales	Totals
1987/88	\$240,000	\$981,000	\$480,000	\$400,000	\$2,101,000

2021	\$104,500	\$135,850	\$ 0	\$209,000	\$449,350
2022	\$104,500	\$135,850	\$ 0	\$209,000	\$449,350
2023²	\$132,750	\$159,300	\$ 0	\$26,550 \$238,950	\$318,600 \$531,000
2024	\$132,750	\$159,300	\$ 0	\$26,550 \$238,950	\$318,600 \$531,000

	Santa Ynez Unit	Point Arguello	Gaviota Terminal	Point Pedernales	Totals
2025³	<u>\$256,650</u> <u>\$132,750</u>	\$159,300	\$ 0	<u>\$26,550</u> <u>\$238,950</u>	<u>\$442,500</u> <u>\$531,000</u>
2026	<u>\$318,600</u> <u>\$132,750</u>	\$159,300	\$ 0	<u>\$26,550</u> <u>\$238,950</u>	<u>\$504,450</u> <u>\$531,000</u>
2027	<u>\$318,600</u> <u>\$132,750</u>	\$159,300	\$ 0	<u>\$26,550</u> <u>\$238,950</u>	<u>\$504,450</u> <u>\$531,000</u>

Amounts have been adjusted for inflation

¹* The County reassessed Santa Ynez Unit and Point Arguello in 2016 and 2017 due to the shutdown of the Plains All-American Pipeline and the two facilities purged of oil. The County reassessed fees in 2016 due to the non-operational status of the Santa Ynez Unit and the facilities being purged of oil.

² The County reassessed the Point Pedernales Project in April 2023 due to the shutdown of the Phillips 66 export Line 300 pipeline system, which caused the Point Pedernales Project to shut-in and be purged of oil.

³ The County reassessed the Santa Ynez Unit for May 2025 – December 2027 due to the restart of production, storage, and treatment of hydrocarbons beginning in May 2025.

1.2 Mitigation Requirements

The Coastal Resources Mitigation Fund (CRMF) provides a mechanism for receiving and utilizing funds assessed as part of oil and gas development project approval and permit issuance. CRMF ensures that impacts identified in project Environmental Impact Reports (EIRs) are mitigated to the maximum extent feasible.

Inclusions: Provisions of CRMF are applicable to all projects related to offshore oil and gas development, where the EIR for the project identifies potential residual impacts to the County's coastal zone of one or more of the following types: coastal recreation, aesthetics, tourism and environmentally sensitive resources. Residual impacts are those impacts remaining after project-specific mitigation has been implemented.

Impacts resulting from all project phases -- including construction, operation, facility removal, and site restoration -- are subject to the provisions of CRMF.

"Residual" is emphasized above as CRMF addresses only those impacts that have not already been mitigated through project-specific conditions. Impacts that can be eliminated by project mitigation measures will continue to be addressed in that manner and only unmitigated impacts fall under the purview of CRMF.

Exclusions: To avoid duplicative mitigation, impacts addressed by any existing program (including in-lieu fee programs) are not included within the scope of CRMF. Impacts and associated mitigation programs or existing funds that are specifically excluded from CRMF are outlined below.

Local Fishermen's Contingency Fund: For coastal developments containing offshore project components such as platforms, pipelines, and piers, monies are required to be set aside in this contingency fund. Funds are specifically used to aid commercial fishermen whose gear is damaged or lost due to offshore oil or gas development.

Fisheries Enhancement Fund: Although payments to this fund are from the same type of offshore developments as referenced above, monies are targeted for improvement of commercial fisheries. The purpose of the fisheries fund is to offset losses of, or disturbances to, commercial fishing areas. Projects that may be eligible for funds from this program are: protection of certain spawning grounds; pier, dock, and harbor improvements for commercial fishermen; and various types of fishery enhancement programs.

Offsite Road Improvement Fees: Road improvement fees are required by the Santa Barbara County Public Works Department to mitigate cumulative direct and/or indirect traffic impacts. Fees are used to improve roads in impacted areas, to install traffic signals and turn lanes, to widen roads, etc.

In-Lieu Coastal Access Fees: Coastal access is an existing County requirement for projects within the coastal zone.

Socioeconomic Monitoring and Mitigation Program: This program addresses mitigation required as a result of oil development population impacts to the County, cities, or special districts and school districts.

2.0 COASTAL RESOURCES MITIGATION FUND PROCESS

2.1 Fee Amounts

The procedure for calculating fee amounts for the Point Arguello, Santa Ynez Unit, Point Pedernales, and the Gaviota Terminal projects is described below. The assessment is based on the following three steps:

1. Identify residual impacts within various issue areas that contribute to an impact, either project-specific, cumulative or both.
2. Assign impact points a value between 0-5.
3. Multiply the number of impacts points for each oil project times the \$20,000 value to determine the annual contribution, adjusted every five years to reflect constant dollars, pursuant to changes in the Consumer Price Index (The Bureau of Labor Statistics, U.S. Department of Labor, "Consumer Price Index for All Urban Consumers, Los Angeles - Long Beach - Anaheim Metropolitan Area.").

Administrative Costs: Administrative costs are covered by the CRMF program. Under a five-year assessment approach, the administrative costs for the CRMF program are relatively minor.

Determining Fee Amounts:

1. Identify residual impacts of the types below. "Residual impacts" refer to impacts remaining after all mitigation measures have been incorporated into the project.
2. Evaluate the entire project, including onshore and offshore impacts that adversely affect residents of, or visitors to Santa Barbara County.
3. Evaluate impacts associated with all phases of the project, including construction, operation, facility removal, and site restoration.
4. Evaluate net residual impacts; include directly related beneficial impacts in the assessment of residual impacts.

Impact Types:

- coastal recreation
- tourism
- aesthetics (visual)
- environmental sensitive resources

Impact Values:

Assign a value from 0-5 to each impact category. A value of one (1) is equivalent to low impact; five (5) signifies high impact. Sum all values to derive a measure of total residual impact. See Tables 2-5 for a summary of the past CRMF point value determinations.

In assigning values, consider the following factors:

- a. area affected by impact,
- b. duration of impact,
- c. frequency of impact,
- d. extent to which impact exceeds impact significance criteria.
- e. number of project components contributing to the impact.
- f. number of people affected,
- g. quality of resource prior to impact,
- h. priority given to impacted resource in the Local Coastal Program and other elements of the County's Comprehensive Plan.

* The County credited ten points spanned over five years since the first two assessments predicted three years of tanker berthing and only one year of tanker berthing occurred.

** The whole point in the Coastal Recreation category reflects the annual impact of the tanks onsite. The three other points distributed among the three categories represents the impact of oil in the storage tanks for three-quarters of the year.

*** One point reflects the annual impact of the purged tanks onsite.

**** The Coastal Resources Mitigation Fund assessment eliminates the remaining last point since removal of all tanks will occur in 2008.

* A half point reduction was given due to staff confirmation that the electrical substation is screened with trees from direct view.

¹* The County reassessed the Point Pedernales Project in 2023 due to the shutdown of the Phillips 66 Line 300 pipeline system and the facility being purged of oil.

2.2 Timing of Payments

CRMF fee requirements may be included as a condition of any discretionary plan or permit approved by the County. Relevant approvals and permits include, but are not limited to, Preliminary Development Plans, Final Developments Plans, Conditional Use Permits, Special Use Permits, and Specific Plans. In no case will different permits for the same project duplicate assessed fees.

The fee is assessed as an annual payment to be paid each year. Annual payments will be due by February 15 of each year. A reassessment of impacts and CRMF contributions for the next five-year period will be done during the last year of the last assessment. A mid-five-year cycle reassessment can occur if circumstances would significantly affect the CRMF fees.

All applicable oil projects are subject to CRMF fees for the life of each project. For purposes of the CRMF program "life of the project" is defined as the following:

"beginning the first date of the initiation of site preparation or construction activities (a) in state or federal waters offshore Santa Barbara County, or (b) at an onshore site within the coastal zone as designated in the County's Local Coastal Program, whichever is earlier; and ending the date County-approved site restoration has occurred at (a) the last offshore, or (b) the last

onshore site that is in or adjacent to the coastal zone and associated with the project, whichever is later."

In all cases, the beginning and ending dates are determined by the Director of the Planning & Development Department.

2.3 Impact and Fee Reassessments

As impacts may not actually occur as predicted by the environmental analysis used for the initial CRMF assessments, fee amounts are to be reassessed throughout the duration of offshore oil and gas development along the County's coastline. Impacts and corresponding fee amounts are to be reassessed at five-year intervals. Reassessments are to be based on information collected as part of the County's project and permit monitoring efforts.

A reassessment for CRMF does not open other conditions of the same plan or permit to reevaluation. A reassessment may be based on the same methodology as described for the initial assessment, or based on an improved methodology if one becomes available in the intervening years and is approved by the Planning Commission and Board of Supervisors prior to its use.

3.0 USE OF COASTAL RESOURCES MITIGATION FUND MONIES

CRMF monies are to be used for a variety of coastal resource protection or improvement projects. Enhancement projects, or programs eligible to receive CRMF monies, are limited to those that are offsite from and not specific to any one development project. That is, the projects eligible for funding must be above and beyond the scope of other mitigation measures required of an individual permit holder.

As the purpose of CRMF is to mitigate coastal impacts, it is the County's intent to actively seek and provide financial assistance to appropriate enhancement projects. The County Board of Supervisors will ultimately determine how CRMF monies are awarded.

3.1 Eligible Enhancement Projects

All projects awarded CRMF monies or support must demonstrate that they are consistent with the goals and policies of the County's Local Coastal Program (LCP). In addition, according to the specific goals of CRMF, eligible projects must emphasize one or more of the following categories:

- coastal land acquisition for public use/preservation,
- coastal restoration or habitat protection,
- coastal tourism or recreation,
- coastal quality of life.

Examples of the type of projects that might be funded are presented below. These are not intended to be all-encompassing, or exclusionary, or necessarily to indicate the County's priorities.

Coastal Tourism and Recreation, such as projects to:

- a. Acquire new coastal recreation areas and coastal access; improve conditions or facilities at existing recreation areas. (See LCP Section 3.7.)
- b. Improve access to recreation areas for non-motorized modes of transportation (bikeways, hiking and equestrian trails). (See LCP Section 3.7.5.)

Coastal Restoration/Habitat Protection, such as projects to:

- a. restore or enhance degraded habitat areas such as wetlands. (See LCP Section 3.9).
- b. purchase land, conservation easements, or development rights in remaining habitat areas for rare and endangered native plants and animals. (See LCP Section 3.9).

Note that eligible projects are not associated with the direct mitigation measures required of an individual development. Note too, that while CRMF monies may be used to acquire, improve, and maintain coastal access, such use of CRMF monies is not interchangeable with, nor a substitute for, in-lieu coastal access fee requirements of specific development projects. CRMF monies may be matched, however, with In-Lieu Coastal Access Fees to better implement the County's Coastal Access Plan.

Enhancement projects may be located in the unincorporated and incorporated areas of Santa Barbara County. Projects in the incorporated areas of the County, or areas subject to a certified coastal program or management program other than the County's, must be consistent with the relevant program. Certified programs include, but are not limited to, the City of Santa Barbara's Coastal Land Use Plan for the City (certified January 22, 1981) and for the Airport (certified May 20, 1983), City of Carpinteria's Coastal Land Use Plan (certified January 27, 1982), University of California at Santa Barbara's Long-Range Development Plan (certified March 17, 1981).

Eligible Project Applicants

Project proposals may be solicited from the public, public agencies, municipalities, special districts, and non-profit organizations, as appropriate for the types of projects desired. All project applicants must demonstrate that their project is for a broad public purpose.

3.2 Enhancement Project Selection Criteria and Selection Process

CRMF projects for funding will be recommended annually to the Board of Supervisors by the Planning & Development Department (P&D), except during the years when the Point Arguello and Santa Ynez Units are not operating, the recommendations will be made every other year. For

those CRMF projects under consideration that are in the jurisdiction of other County departments, such as the County Community Services Department, P&D, in conjunction with the appropriate department, and the Administrative Office, will provide the Board of Supervisors with an assessment of long-term fiscal impacts associated with these projects. The diversity of projects ultimately selected for funding will be at the sole discretion of the Board. The Board may give priority to projects where combined funding resources, such as matching grants or leveraged funds, can be utilized to increase the effectiveness of CRMF expenditures. The Board of Supervisors will hold a public hearing to select CRMF projects on the funding schedule and cycle to be determined by the Board. The Planning & Development Department will solicit public input and provide discussion of potential CRMF projects through public workshops. These workshops will be held in the North County and the South Coast area, prior to the Board's hearings on CRMF project allocations.

3.3 Revised Enhancement Project Selection Criteria and Selection Process

The Board of Supervisors has expressed concerns that the selection criteria have been excessively broad. As a result, numerous proposals that have not been consistent with the major goals of the CRMF program have not been screened out prior to the Board's hearing. The Board has been, in particular, concerned with projects not meeting the coastal area criterion and the acquisition criterion as was the intent of the original guidelines. Subsequently, the Board has revised the language of No. 1 Coastal Area criterion and No. 4 Acquisition Project criterion to ensure that all projects will enhance those two major goals of the CRMF program.

The Board has directed Planning & Development Department Energy & Minerals Division staff to advise whether or not proposed projects will be located in the coastal area or will be coastal related as described in revised No. 1 Coastal Area Criterion below. The term "*coastal area*" provides the Board of Supervisors with sufficient flexibility to enhance coastal resources that may extend beyond the Coastal Zone boundary, yet are still coastal related. Staff was directed to encourage those projects, which are coastal by virtue of location or relationship. Also, staff will assign a higher priority to revised No. 4 criterion to ensure that acquisition projects will be implemented as a major goal of the CRMF program.

Coastal Resources Mitigation Fund: Enhancement Project Criteria

Projects requesting funding from CRMF would be assessed according to the criteria specified below:

1. Enhancement projects must be located in the coastal area or have a coastal relationship, and must be consistent with the County's Local Coastal Program and Comprehensive Plan and with the other local jurisdictions' applicable coastal programs. Enhancement projects should be located within geographical proximity to oil and gas onshore/offshore development activities while still providing for the broadest public benefit.

2. Projects should compensate for coastal impacts due to oil and gas development, specifically for sensitive environmental resources, aesthetics, tourism, and negative effects on coastal recreation in the County.
3. Projects should provide a level of broad public benefit.
4. The intent of the CRMF program is to fund coastal acquisition and capital improvement projects; therefore, projects which offer coastal acquisition and capital improvement will receive higher priority than those projects which do not.
5. Projects should utilize matching funds and/or in-kind services to the maximum extent possible.
6. Projects should be self-supporting or should require minimum on-going County operations/maintenance costs once the project is completed and implemented.
7. Projects to be funded should lack other viable funding mechanisms to complete the project.
8. The feasibility of implementing and completing the project shall be considered. Projects with a high probability of success should be given preference.

3.4 Financial Assistance Options

The Board of Supervisors may choose to award CRMF monies, or support, in a variety of forms, including grants, loans, matching funds, leverage arrangements, and loan guarantees.

3.5 Enhancement Project Application Requirements

An applicant requesting CRMF funds must submit the following information as part of the CRMF application, but is not limited to:

- a. Project description, including sufficient detail for staff to verify project description and seek additional information, if relevant. (For example, in the case of a proposal for an easement or for the acquisition of property, applicant should provide the name, address and telephone number of the property owner, together with the assessor's parcel numbers of the properties affected and the current status of any negotiations in progress.
- b. Project budget, including detailed itemization of expenses, estimated costs of materials, etc.
- c. Project construction or implementation schedule.
- d. Schedule of milestones the applicant agrees would be fair progress check points for Energy & Minerals Division project managers to track.

- e. Descriptive slides, photographs, maps to help explain the project and its setting.
- f. Detailed explanation of the public benefits of the project.
- g. Applicants proposing acquisition projects must describe how ownership of real property to be acquired will be held.
- h. Demonstration of non-profit status by attaching relevant evidence such as a declaration of the group's California State Tax Exemption status and a description of the group's voting membership including the number of voting members and the group's statement of purpose.
- i. When a city within the county (or other organization and municipality) submits more than one proposal in a given funding cycle for consideration by the Board, that city shall rank the priority of its CRMF proposals and further justify the priority of each proposal in the context of its own budgetary priorities.

Additional informational requirements may be contained in the Request-For-Proposal (RFP) packages prepared by the Planning & Development Department, Energy & Minerals Division. Potential applicants must provide all information requested in the RFP package.

3.6 Fund Deferral Program

To provide adequate funding for acquisition projects, in April 1990 the Board directed that a program deferring 1/2 of each year's contributions to allow available funds to accrue shall be implemented. These deferred funds will be used at a point when the Board decides an appropriate project has been initiated. The Board may also wish to allocate funds to staff to develop acquisition projects acceptable to CRMF criteria.

Exceptions to deferring half of each year's contributions towards acquisition projects, have occurred in the past. In February and May of 2007, the Board of Supervisors directed that at least 65% of the CRMF fees in 2007-2009 be designated for acquisitions and the remaining 35% for both general allocation and acquisition. In April of 2010, the Board of Supervisors directed that no 2010 CRMF fees be deferred for acquisitions in order to provide itself with additional flexibility in allocating CRMF grants, whether for acquisitions or general allocation. This change is for one year only – 2010 – after which the percentage of funds returned to a minimum of 50%. The Board of Supervisors directed that all the 2012 and 2013 CRMF fees be designated for general allocation. The Board of Supervisors directed that all 2014 CRMF fees be available for both acquisition and general allocation type projects. Beginning in 2017, a portion of annual CRMF fees will be set aside towards a Hollister Ranch access program until it reaches \$1 million (see Section 3.8 below). 1/2 of the remaining annual fees will be designated for acquisitions.

3.7 Fund Administrative Guidelines: Requirements of Grantees

- a. Each grantee, except for an agency of Santa Barbara County, shall enter into a contractual agreement with Santa Barbara County. The contract shall contain provisions that require the timely and successful completion of the project as proposed. Any substantive modification to the project shall require a modification to the contractual agreement.
- b. All grantees shall commence projects within one year of the decision by the Board of Supervisors to award the CRMF grant. If the project has not commenced within one year, the CRMF grant shall become void and all associated money shall revert back to CRMF for new allocation. The Planning & Development Department may grant a maximum extension of one year if the grantee can demonstrate good cause for the delay.
- c. All grantees shall conduct their projects in accordance with their proposed schedule, and such schedule shall be included in the proposal. The County shall send written warning to any grantee that falls more than six months behind schedule, and the County shall send a second written warning to any grantee that falls more than nine months behind schedule. The County shall reclaim the unspent portions of all grants for projects which fall behind schedule by more than twelve months, without further notice.
- d. All grantees shall submit annual written reports on project status, including photographs to document the work completed to date. These reports shall include verification that the CRMF grant is being used in accordance with the project description contained in the contract between the County and the grantee or, in the case of County agencies, in accordance with the project description as proposed. The contractual agreement shall specify when annual reports fall due.
- e. Any County agency that is a CRMF grantee shall be accountable to commence and complete the CRMF project as proposed. Any substantial changes in the project description must be approved by the Planning & Development Department as the administering agency, in consultation with the County Administrator's office. Changes in the project schedule of more than six months must also be approved by the Planning & Development Department in consultation with the County Administrator's office.
- f. A CRMF grantee shall no longer be eligible for CRMF grants or loans in the future if the grantee has defaulted on a previous CRMF contract. Exceptions shall be considered only for minor defaults that do not result in a significant misuse of the grant as determined by the county. Additionally, the county will exercise its options to seek full refund of CRMF grants when a major default of the terms and conditions of the grant has occurred. County agencies that receive CRMF awards shall be treated in a similar manner if the agency does not use the grant as proposed in its CRMF application.

3.8 Coastal Commission Special Condition: Point Arguello Unit

The California Coastal Commission (CCC) added two special conditions to the Point Arguello Project's Coastal Development Permit (85-FDP-32), when it considered approval of the permit on appeal. Special Condition No. 1 requires the permittee to provide \$1 million to Santa Barbara County through its CRMF payments. The permit condition earmarked use of the \$1 million as providing initial funds to implement a public access program for the Hollister Ranch. The \$1 million was paid by Point Arguello but was not set aside for a Hollister Ranch Access Program. Beginning in 2017, approximately \$125,000 - \$250,000 of CRMF fees will be set aside for the next five to seven years to comply with the Coastal Commission's special condition (see Table 6 below).

Table 6. Approved Coastal Resources Mitigation Fund Monies Set Aside for the Hollister Ranch Access Program

Year	Amount
2017	\$125,450
2018	\$156,138
2019	\$156,138
2020	\$156,138
2021	\$156,138
2022	\$124,999
2023	\$124,999
Total	\$1,000,000
