Public Comment – Group 8

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

Victoria Quinn

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

THIRD DISTRICT OFFICE

TO: *Hartmann*

105 E Anapamu St # 406
Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed, *Delfina Rebollo*

Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

Krista Rodkey

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed, *Lynsee Voss*

THIRD DISTRICT OFFICE

TO: Hartmann

105 E Anapamu St # 406
Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed, *Katie Bass*

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

TO: *Joan Hartmann*

105 E Anapamu St # 406
Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

Name: *Sophia Jeffe*

Address: *6721 Trigo Road Unit A*

City: *Goleta* Zip: *93117*

TO: *Joan Hartmann*

105 E Anapamu St # 406
Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

Name: *Elena Salinas*

Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

THIRD DISTRICT OFFICE

TO: *Joan Hartmann*

105 E Anapamu St # 406
Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,

Name: PAOLO MARCHI

TO: Joan Hartmann

105 E Anapamu St # 406
Santa Barbara, CA 93101

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed, *Cameron Allen*

Dear Santa Barbara County Supervisor,

I live in Santa Barbara County and care deeply about our coast, community and climate.

I urge you to deny two permit applications that would allow ExxonMobil to restart offshore drilling in the Santa Barbara Channel: Exxon's permit application to truck oil along Highway 101 and Route 166, and Plains Pipeline's application to build another coastal oil pipeline.

Offshore drilling is a dirty and dangerous practice that does not belong in our ocean. Oil spills— an inevitable and routine part of offshore oil development — can injure or kill marine wildlife, ruin beaches, and devastate coastal communities.

I'm counting on you to do what's right to protect our local environment, wildlife and residents.

Signed,
