Dear Supervisors,

*I am writing in regard to item 5 on your agenda to ask you to please approve the recommendation of the Floodplain Administrator. Our property is negatively impacted by the current mapping which does not reflect the most accurate modeling from FEMA. Under the current mapping, our plans to build a residence on our property would have to include significant unnecessary grading that would be expensive and require me to build higher, with no advantage.. The staff says that FEMA will implement this mapping eventually, but our project is underway, and FEMA has been slow to implement new mapping.*

*Please help us on this and approve the project as recommended.*

*Thank you.*

Respectfully,

David Johnson
