

RESOLUTION OF THE BOARD OF SUPERVISORS
COUNTY OF SANTA BARBARA, STATE OF CALIFORNIA

IN THE MATTER OF SANTA BARBARA COUNTY
(ENERGY EFFICIENCY FOR COUNTY OWNED
AND LEASED FACILITIES)

RESOLUTION NO. 16-_____

ENERGY EFFICIENCY STANDARDS POLICY RESOLUTION

WHEREAS, energy efficiency improvements in Santa Barbara County owned facilities and operations save Santa Barbara County money and boost Santa Barbara County's economy by investing in green technology companies and green jobs; and,

WHEREAS, the Santa Barbara County adopted Resolution 09-059 "to take immediate, cost effective and coordinated steps to reduce the County's collective greenhouse gas emissions"; and,

WHEREAS, the Santa Barbara County adopted Resolution 14-049, which provides: "All new Santa Barbara County owned facilities and major renovations beginning design after 2025 be constructed as Zero Net Energy Facilities with an interim target for 50% of new facilities beginning design after 2020 to be Zero Net Energy. Santa Barbara County departments shall also take measures toward achieving Zero Net Energy for 50% of the square footage of existing Santa Barbara County owned facilities by 2025 and the remaining 50% by 2035"; and,

WHEREAS, the California Global Warming Solutions Act of 2006 requires the State to reduce greenhouse gas emissions to 1990 levels by 2020 and beyond, and the energy used in buildings accounts for the second largest contribution to California's greenhouse gas emissions; and,

WHEREAS, the California Energy Commission's Title 24 energy efficiency standards and California Green Building Standards Code have saved Californians more than \$74 billion in reduced electricity bills since 1977. These standards conserve electricity and natural gas and prevent the state from having to build more power plants (<http://www.energy.ca.gov/title24/>); and,

WHEREAS, The U.S. Department of Energy published 10 CFR Part 433 to establish an energy efficiency performance standard and green building certification requirements for new federal commercial and multi-family high-rise buildings (<https://www.energycodes.gov/energy-efficiency-standards-federal-buildings>).

NOW, THEREFORE, IT IS HEREBY RESOLVED AND ORDERED that:

The County of Santa Barbara Energy Efficiency Standards Policy and the requirements of the latest version of the California State Energy Code (Title 24, Part 6) and California State Green Building Code (CALGreen) shall be adopted into County policy but shall not apply to either the Tajiguas Resource Recovery Project or to the Northern Branch Jail AB900 Project.
