**ANDERSON PURISIMA HILLS
CONSERVATION EASEMENT
DEED and AGREEMENT**

This Conservation Easement Deed and Agreement ("Conservation Easement") is granted on this ____ day of _____, _____, by SONIA CHANTAL ANDERSON, an unmarried woman, ("LANDOWNER"), to the COUNTY OF SANTA BARBARA, a political subdivision of the State of California ("GRANTEE"), each a "party" and together the "parties" to this Conservation Easement, for the purpose of establishing in perpetuity the Conservation Easement and associated rights described below.

Recitals

A. LANDOWNER is the sole owner in fee simple of that certain real property commonly known as 3200 Gypsy Canyon Road, Lompoc, California, and identified as Assessor's Parcel Nos. 099-060-021 and 099-070-036, consisting of approximately 160 acres, located in the unincorporated portion of the County of Santa Barbara, State of California, described in Attachment "A" attached hereto and incorporated herein by this reference ("Property"). LANDOWNER intends to grant a conservation easement over a portion of the Property ("Easement Area"), as legally described in Attachment "B" and illustrated on Attachment "C," ("Conservation Easement Map" and "Easement Areas A, B, C, and D") attached hereto and incorporated herein by this reference.

B. The Easement Area possesses certain environmental attributes of great importance to the people of Santa Barbara County and the people of the State of California, including a potential breeding pond for the Federally-protected California Tiger Salamander (CTS) and upland habitat for CTS consisting of intact small mammal burrow systems, valuable wildlife habitat, open space, and rangeland (hereinafter "Conservation Values"). Attachment "B" describes four areas of the Easement Area as areas A, B, C, and D, where areas A, B and C shall be preserved for agricultural activities that are consistent with the preservation and protection of CTS migratory activities and upland habitat use in the Easement Area, and where

Area D shall be preserved for the enhancement and preservation of a potential breeding pond for the CTS (hereinafter "CTS Breeding Pond"), all as described in Attachment "B", attached hereto and incorporated herein by reference.

C. Areas A, B and C of Attachment "C" depict areas that will be retained in perpetuity as rangelands with the potential to provide migratory corridors for the CTS to access certain CTS breeding ponds known as Ponds 33, 34 and 35. Area D of Attachment "C" depicts a potential CTS breeding pond (known as "Pond 49") with a three hundred-foot buffer area surrounding the pond. It is intended that the pond will be repaired and rehabilitated by re-grading and stabilizing the berm, re-vegetating the area as necessary, and excavating and re-grading the pond to improve water-holding capacity. Area D will be preserved primarily as habitat for the CTS.

D. LANDOWNER agrees to convey this Conservation Easement to GRANTEE to assure that the Conservation Values provided by the Easement Area will be conserved and sustained forever as provided herein, and that uses of the land that are inconsistent with the Purpose of this Easement will be prevented or corrected.

E. LANDOWNER further intends, as owner of the Property, to convey to GRANTEE the right to preserve and protect the Conservation Values of the Easement Area in perpetuity.

F. The grant of this Conservation Easement will further the policy purposes of the following clearly delineated governmental conservation policies:

Section 815 of the California Civil Code, in which the California Legislature has declared: (1) that "the preservation of land in its natural, scenic, agricultural, historical, forested, or open-space condition is among the most important environmental assets of California"; and (2) that it is "in the public interest of this state to encourage the voluntary conveyance of conservation easements to qualified nonprofit organizations";

The Agricultural Element of the Santa Barbara County Comprehensive Plan, the County Right to Farm Ordinance and other policies and zoning ordinances that are intended to preserve Santa Barbara County's productive agricultural lands.

The June 29, 2010 Conditional Settlement Agreement Between the United States Fish and Wildlife Service and the County of Santa Barbara, California in which the County of Santa Barbara has agreed to cause the acquisition, grant and recording of a Conservation Easement to provide for protection of CTS habitat and Conservation Values in perpetuity.

G. GRANTEE recognizes that the Conservation Values associated with the physical environment of the Easement Area exist because of the past stewardship of LANDOWNER and depend on the future good stewardship decisions of LANDOWNER and its successors. LANDOWNER is entrusted with those future management decisions, provided that such changes

do not significantly impair the Conservation Values of Easement Area. GRANTEE is entrusted with determining that the Conservation Values have been protected.

H. The current physical and biological conditions of the resources of the Easement Area, as well as its current uses and state of improvement, are described in a "Baseline Inventory Report," prepared by the GRANTEE with the cooperation of the LANDOWNER, consisting of maps, photographs, and other documents, and acknowledged by both to be complete and accurate as of the date of this Conservation Easement. LANDOWNER, GRANTEE and the Fish and Wildlife Service have received copies of this report, which will be used by GRANTEE to assist in its monitoring and enforcement of LANDOWNER's compliance with this Conservation Easement.

I. The United States Fish and Wildlife Service ("FWS"), an agency within the United States Department of the Interior, has jurisdiction over the conservation, protection, restoration, and management of fish, wildlife, native plants, and the habitat necessary for biologically sustainable populations of these species within the United States pursuant to the Endangered Species Act, 16 U.S.C. §§ 1531, et seq. ("ESA"), the Fish and Wildlife Coordination Act, 16 U.S.C. §§ 661-666c, the Fish and Wildlife Act of 1956, 16 U.S.C. §§§ 742(f), et seq., and other provision of Federal law.

Deed and Agreement

In consideration of the recitals set forth above, and in consideration of their mutual promises and covenants, LANDOWNER hereby grants and conveys to GRANTEE, its successors and assigns, and GRANTEE hereby accepts, a perpetual Conservation Easement as defined by Section 815.1 of the Conservation Easement Act of 1979 (California Civil Code Section 815, *et seq.*), of the nature and character described in this Conservation Easement.

1. **PURPOSE.** The Purpose of this Conservation Easement is to enable the Easement Area to remain in conservation use to establish and protect breeding and dispersal habitat for the CTS in Area D, to provide dispersal and upland habitat and protect the rangeland aspects of Areas A, B, and C within the Easement Area, and to prevent any use of the entire Easement Area that will impair or interfere with the Conservation Values ("Purpose"). The parties hereto intend that this Conservation Easement will confine the use of the Easement Area to such activities that are consistent with the Purpose, including without limitation, those involving the preservation and enhancement of the CTS and their habitat in a manner that is consistent with the habitat conservation purposes of this Conservation Easement.

2. **AFFIRMATIVE RIGHTS CONVEYED TO GRANTEE.** To accomplish the Purpose, the following rights and interests are conveyed to GRANTEE by this Conservation Easement:

(a) **Identify Resources and Values.** To identify, preserve and protect in perpetuity the character, use, utility, soil and water quality, and the Conservation Values of the Easement Area.

(b) **Monitor Uses and Practices.** To enter upon, inspect, observe, and study the Easement Area for the purposes of identifying the current uses and practices thereon and the baseline condition thereof, and to monitor the uses and practices regarding the Easement Area to determine whether they are consistent with this Conservation Easement. Such entry shall be permitted upon prior notice to LANDOWNER, and shall be made in a manner that will not unreasonably interfere with LANDOWNER's use and quiet enjoyment of the Property.

(c) **Prevent Inconsistent Uses.** To prevent any activity on or use of the Easement Area that is inconsistent with the Purpose and to require the restoration of such areas or features of the Easement Area that may be damaged by any inconsistent activity or use. However, it is not the intent of the parties to limit LANDOWNER's discretion to implement rangeland uses and management practices in the Easement Area, as described in Paragraph 3(b) below and provided that those uses and practices are consistent with the terms of this Easement.

(d) **Provide Signage.** To erect and maintain a sign or signs or other appropriate markers in prominent locations on or near the Easement Area, visible from a public road, bearing information indicating that the Easement Area is protected by LANDOWNER and GRANTEE. The wording of the information shall be determined by LANDOWNER and GRANTEE, but may include logos and shall clearly indicate that the Property is privately owned and not open to the public. GRANTEE shall be responsible for the costs of erecting and maintaining such signs or markers.

3. **PERMITTED USES AND PRACTICES.** LANDOWNER and GRANTEE intend that this Conservation Easement shall confine the uses of the Easement Area to conservation and rangeland activities consistent with the Purpose and Conservation Values and such other related uses as are described herein. The following uses and practices, if in accordance with federal, state and county laws and ordinances, to include compliance with the Endangered Species Act, and to the extent not inconsistent with the Purpose, are specifically permitted:

(a) **Restoration/Management/Monitoring Plan.** A Restoration/Management/Monitoring Plan ("Plan") has been prepared and approved by LANDOWNER, County of Santa Barbara and FWS, and is included in the Baseline Inventory Report. Implementation of the Plan is a permitted use.

(b) **Rangeland and Compatible Uses.** To use the Easement Area to sustain its primary agricultural utility as rangeland, grassland, chaparral and woodland, providing both economic benefits that occur from livestock grazing and compatible uses, and public benefit associated with the wildlife habitat, water quality, watershed and open space benefit of rangeland. Compatible uses, as permitted herein, shall not displace or compromise the utility of the Easement Area as rangeland.

(c) **Existing Improvements.** To use improvements identified in the Baseline Inventory Report as existing at the time that report was prepared. Any approved existing improvements in the Easement Area may be repaired, and replaced at their existing locations, provided that any repair, or replacement must occur during the dry season (May to October).

Any work proposed outside of the dry season requires prior approval of GRANTEE and advance coordination with the FWS.

(d) **Additional Agricultural Structures and Improvements** To enlarge existing structures that are reasonably necessary for the rangeland uses of the Easement Area and to construct new structures and improvements to be used solely for rangeland uses in the Easement Area, including hay shelters, fences, erosion control structures, culverts, salt stations, cattle water tanks, and pump houses; provided that new structures or improvements in Area D of Attachment "C" shall be limited those that protect or enhance the pond and buffer area as CTS habitat, necessary fencing or rangeland improvements that cannot feasibly be located outside of Area D. Salt stations, cattle water tanks and other cattle attractants must be kept 300 feet from Pond 49 and out of areas with concentrations of small mammal burrows. Enlargement of existing structures or construction of new structures will not occur without prior notice to and approval of GRANTEE and FWS.

(e) **Agricultural Grading and Mowing.** Soil grading to control erosion, in accordance with sound, generally accepted rangeland management practices will not occur within the Easement Area without prior written concurrence from the FWS. No other grading is permitted in the Easement Area. Mowing or haying is allowed in the Easement Area only during the dry season (May to October) unless LANDOWNER obtains prior approval of COUNTY to work outside the dry season and coordinates in advance with FWS. No agricultural grading or plowing is permitted to prepare land for crop production.

(f) **Fences.** To repair and replace at their existing locations on the Easement Area existing fences, scales and corrals for purposes of reasonable and customary management of livestock and wildlife, New fences, scales and corrals at new locations may be constructed for such purposes without further permission from GRANTEE, provided that any new fence shall be sited and designed to protect the Purpose and Conservation Values and avoidance of small mammal burrows, including but not limited to wildlife movement. Repair, replacement and construction of fences shall occur during the dry season (May to October), unless LANDOWNER obtains prior approval of GRANTEE to work outside of the dry season and coordinates in advance with FWS.

(g) **Water Resources.** An irrigation system consisting of tanks and drip lines, and/or watering trucks may be used in the Easement Area for the purpose of maintaining appropriate plant species within the Easement Area, or to maintain the CTS Breeding Pond. Other than the CTS Breeding Pond in Area D, other surface water reservoirs, water resources, water-related improvements, or ponds may not be developed or maintained in the Easement Area without prior notice to and approval of the GRANTEE and FWS, and any such water improvements must ensure preservation and protection of the Conservation Values.

(h) **Use of Agrichemicals.** With prior notice to and approval of GRANTEE and FWS, to use agrichemicals within the Easement Area, including, but not limited to, fertilizers, pesticides, herbicides and fungicides in those amounts and with such frequency of application necessary to accomplish reasonable rangeland or conservation purposes; provided that such use shall be in accordance with county, state and federal laws and regulations, and such

use shall be carefully circumscribed near surface water, seasonal water courses. Use of pesticides, herbicides, fertilizers and fungicides shall be avoided within the topographic watershed of Pond 49 (the northern portion of Area D and the canyon draining into the pond from the north) and of Pond 33 (north and east of Pond 33 along the dirt roadways). There shall be no poisoning of small mammals within Easement Area.

(i) **Control of Plants and Animals.** To control pests, bullfrogs, and non-native plants by the use of selective control techniques.

(j) **Utility Easements.** To provide for utility easements to public and quasi-public utilities consistent with the Conservation Values of this Conservation Easement, and for existing agricultural and residential uses of the Property.

(k) **Hunting Uses.** To engage in and permit others to engage in hunting uses of the Easement Area; provided that such activities require no surface alteration or other development of the land and do not impair the Conservation Values nor harm small mammals in Easement Area.

(l) **Passive Recreational Uses.** To engage in riding, hunting, research and educational uses, as well as noncommercial passive recreational uses such as wildlife viewing, hiking and photography and associated facilities, including riding trails and jumps, for the personal use of residents and guests of LANDOWNER, are permitted in the Easement Area, provided that no such use or associated facility shall be allowed to interfere with, impair or otherwise burden the Conservation Values.

(m) **Roads.** LANDOWNER may utilize roads in the Easement Area existing at the time of execution of this Conservation Easement. All roads within the Easement Area shall be limited to light dirt roads used for ranching operations, maintenance, and emergencies only.

4. **PROHIBITED AND LIMITED USES.** Unless otherwise permitted, any activity on or use of the Easement Area that is inconsistent with the Purpose and Conservation Values of this Conservation Easement is prohibited. LANDOWNER promises that it will not perform, or knowingly allow others to perform, any act or use on or affecting the Easement Area described above in conflict with the covenants set forth in this Conservation Easement. LANDOWNER authorizes GRANTEE to enforce these covenants, including restoration where reasonably appropriate. Without limiting the generality of the foregoing, the following activities and uses are deemed inconsistent with the Purpose and Conservation Values of this Conservation Easement and are expressly prohibited:

(a) **Residential Use.** Construction and use of any residential and accessory structures within the Easement Area is prohibited. This Easement does not restrict LANDOWNER's ability to use, repair, expand or relocate the existing residence or accessory structures outside of the Easement Area, subject to all applicable zoning and land use regulations.

(b) **Subdivision.** The subdivision of the Property that would affect the Easement Area, whether by physical, legal or any other process is prohibited.

(c) **Development Rights.** LANDOWNER hereby grants to GRANTEE all development rights, except as specifically reserved to LANDOWNER herein, that are now or hereafter allocated to, implied, reserved or inherent in the Easement Area, and the parties agree that such rights are terminated and extinguished, and may not be used on or transferred to any portion of the Property as it now or hereafter may be bounded and described, or to any other property adjacent or otherwise. The Easement Area may not be used for the purpose of calculating permissible development or lot yield of any other property, provided, however, that leases of a portion or all of the Easement Area for rangeland use shall not be prohibited by this paragraph. LANDOWNER and GRANTEE agree that the Property consists of one (1) legal parcel and that no additional separate legal parcels currently exist within the Property that may be recognized by a certificate of compliance pursuant to Government Code Section 66499.35, based upon previous patent or deed conveyances, subdivisions or surveys. LANDOWNER will not apply for or otherwise seek recognition of additional legal parcels within the Property that affect the Easement Area, based on certificates of compliance or any other authority.

(d) **Construction of Buildings, Facilities and Other Structures.** The construction of any residential or animal storage facility or any structure of any other type within the Easement Area, unless specifically authorized by Section 3 hereof. Feedlots and livestock pens are prohibited.

(e) **Signs.** No billboards shall be erected in the Easement Area. Signs describing the permitted activities in the Easement Area or erected to control unauthorized entry or use are permitted, insofar as such signs do not significantly impair the Conservation Values.

(f) **Paving and Road Construction** LANDOWNER shall not pave any existing unpaved road or construct any new paved road within the Easement Area, whether for access or for another purpose, without prior notice to and approval of GRANTEE and FWS. GRANTEE and FWS approval of additional road paving or construction shall be based upon LANDOWNER's demonstration that the proposed improvements and location of any such road will not diminish or impair the Purpose and Conservation Values or, if this finding cannot be made, that the road improvements and location are necessary to provide access to structures or improvements permitted by this Conservation Easement or are necessary to meet governmental requirements. Subject to prior notice to and approval of GRANTEE and FWS, LANDOWNER may relocate existing unpaved agricultural roads within the Easement Area as unpaved agricultural roads, provided that abandoned roads shall be allowed to return to a natural condition or shall be converted to rangeland use as may be permitted under this Conservation Easement. For purposes of this paragraph, references to "paving" shall include covering of the soil surface with concrete, asphalt, or other impervious material, provided that in order to make unpaved roads passable, the LANDOWNER may apply a limited amount of gravel sufficient to maintain a light dirt road to existing or future unpaved roads in the Easement Area.

(g) **Motorized Vehicles.** The use of motorized vehicles off of roads within the Easement Area is prohibited, except by LANDOWNER or others under LANDOWNER's

control for agricultural uses of the Property; provided that other uses of motorized and/or off-road vehicles may be permitted within the Easement Area when necessary for maintenance of utilities, retrieval of large game, or for emergency purposes. Motorized vehicle races and the construction of motorized off-road vehicle courses are specifically prohibited.

(h) **Erosion.** Any use or activity that causes significant degradation of topsoil quality, pollution or an increase in the risk of erosion in the Easement Area is prohibited.

(i) **Mining.**

(i) Surface Mining. The mining, extraction, or removal of soil, sand, gravel, oil, natural gas, fuel, or any other mineral substance, using any surface mining method, is prohibited in the Easement Area. Notwithstanding the foregoing, soil, sand, gravel or rock may be extracted without further permission from GRANTEE provided that such extraction is of material solely for use in the Easement Area, is in conjunction with and in furtherance of activities permitted herein, is accomplished in a manner which is consistent with, does not interfere with, impair or otherwise burden the Conservation Values, and does not disturb the CTS breeding pond in Area D of Attachment "C".

(ii) Mineral Rights. Any right, title, and interest in subsurface oil, gas, and minerals shall not be sold separately from the surface property, and the manner of exploration for, and extraction of any oil, gas or minerals shall be only by a subsurface method, and shall not damage, impair or endanger the protected Conservation Values of the Easement Area, and shall not involve ground disturbance in the Easement Area.

(j) **Watercourses.** The alteration or manipulation of watercourses located on or near the Easement Area is prohibited, except alteration or manipulation that is required to implement the Restoration/Management/Monitoring Plan or to otherwise preserve and enhance the CTS Breeding Pond. Upon expiration of the Plan, GRANTEE may engage in or approve alterations or manipulations of watercourses only in furtherance of the Purpose and Conservation Values of this Easement. Any alterations or manipulation of watercourses within Easement Area or of the CTS Breeding Pond require prior notice to and approval of GRANTEE and FWS.

(k) **Native Tree and Vegetation Management.** Cutting or clearing of native trees and vegetation is prohibited in areas outside of existing or approved roads, trails and utility easements, except as provided below. Selective control and removal of non-native invasive vegetation is permitted and encouraged. LANDOWNER may clear or trim native trees and vegetation only:

(i) To maintain defensible space, pursuant to the requirements of the Santa Barbara County Fire Department, around existing structures, roads and utilities, with prior notice to and approval of GRANTEE and FWS.

(ii) In an emergency when necessary to prevent personal injury or property damage such as flood or fire. LANDOWNER shall notify GRANTEE and FWS prior to or as soon as possible after beginning any emergency clearing.

(iii) To control insects and disease or promote the ecological health of the trees or vegetative community, including thinning of undergrowth and removal of senescent, dead and decadent plant material, under the direction of a qualified biologist or certified arborist, with prior notice to and approval of GRANTEE and FWS.

(iv) To protect and preserve the CTS Breeding Pond, under the direction of a qualified biologist, and with prior notice to and approval of GRANTEE and FWS.

(l) **Trash.** The disposal, dumping or accumulation of any kind of trash, refuse or derelict equipment in the Easement Area is prohibited.

(m) **Agricultural Intensification and Other Incompatible Uses.** There shall be no disking, row crop cultivation, vineyard installation, plowing, agricultural grading or till operations within the Easement Area. The use of the Easement Area for construction or operation of a golf course, commercial recreational facility, commercial poultry or hog facility, or similar high intensity activity is prohibited.

(n) **Industrial and Non Agricultural Commercial Uses.** All industrial, commercial, and commercial recreational uses of the Easement Area not expressly authorized herein are prohibited.

(o) **Animal Feedlots or Greenhouses.** The construction, maintenance or use of any animal feedlot, livestock pen or greenhouse structure in the Easement Area is prohibited.

(p) **Storage of excess material.** Long-term (longer than 4 consecutive months) storage of excess material (pipes, lumber, disabled vehicles, ranch equipment, etc.) is prohibited.

(q) **Harm to Small Mammals.** Poisoning, trapping, shooting, or otherwise harming small mammals or their burrows within Easement Area is prohibited.

5. **RESERVED RIGHTS.** LANDOWNER reserves to itself, and to its Personal Representatives, heirs, successors and assigns, all rights accruing from the ownership of the Property, including the right to engage in or permit or invite others to engage in all uses of the Property that are not expressly prohibited herein and are not inconsistent with the Purpose of this Conservation Easement. For purposes of this Paragraph 5 the term "Personal Representative" shall include only those persons or entities acting in a capacity such as trustee, executor, administrator or conservator for LANDOWNER with the legal authority to act for and on behalf of LANDOWNER. Without limiting the generality of the foregoing, the following rights are expressly reserved:

(a) **Water Rights.** LANDOWNER shall retain, maintain and preserve the right to use all water rights associated with the Property, which LANDOWNER represents are sufficient to sustain Conservation Values and present and future rangeland uses in the Easement Area, so long as such use does not impair the Conservation Values. LANDOWNER shall not transfer, encumber, lease, sell, or otherwise separate any water rights from the Property.

(b) **Mineral Rights.** All right, title, and interest in subsurface oil, gas, and minerals; provided, however, that the manner of exploration for, and extraction of, any oil, gas or minerals shall be only by a subsurface method, and shall not damage, impair or endanger the protected Conservation Values.

(c) **Responsibilities of LANDOWNER and GRANTEE Not Affected.** Other than as specified herein, this Conservation Easement is not intended to impose any legal or other responsibility on the GRANTEE, or in any way to affect any existing obligation of the LANDOWNER as owner of the Property. Among other things, this shall apply to:

(i) **Taxes.** LANDOWNER shall pay before delinquent all taxes, assessments, fees and charges of whatever description levied on or assessed against the Property. If GRANTEE is ever required to pay any taxes or assessments on the Property, LANDOWNER will promptly reimburse GRANTEE for the same.

(ii) **Upkeep and Maintenance.** LANDOWNER shall continue to be solely responsible for the upkeep and maintenance of the Easement Area. GRANTEE shall have no obligation for the upkeep or maintenance of the Easement Area.

(iii) **Liability and Indemnification.** In view of GRANTEE's negative rights, limited access to the land, and lack of active involvement in the day-to-day management activities on the Property, LANDOWNER shall and hereby agrees to indemnify, protect, defend and hold GRANTEE, its officers, directors, members, employees, contractors, legal representatives, agents, successors and assigns harmless from and against all liabilities, costs, losses, orders, liens, penalties, damages, expenses, or causes of action, claims, demands, or judgments, including without limitation reasonable attorney's fees, arising from or in any way connected with injury to or the death of any person, or physical damage to any property, or any other costs or liabilities resulting from any act, omission, condition, or other matter related to or occurring on or about the Property, regardless of cause, unless solely due to the gross negligence or willful misconduct of the GRANTEE. GRANTEE shall be named as an additional insured on all of LANDOWNER's insurance policies related to the Property.

6. **NOTICE AND APPROVAL.** The purpose of requiring LANDOWNER to notify GRANTEE prior to undertaking certain permitted activities is to afford GRANTEE an adequate opportunity to monitor the activities in question to ensure that they are designed and carried out in a manner that is not inconsistent with the Purpose of this Conservation Easement.

Whenever notice is required as set forth in this Conservation Easement, LANDOWNER shall notify GRANTEE in writing not less than thirty (30) days prior to the date LANDOWNER intends to undertake the activity in question. The notice shall describe the nature, scope, design, location and any other material aspect of the proposed activity in sufficient detail to permit GRANTEE to make an informed judgment as to its consistency with the Purpose of this Conservation Easement. GRANTEE shall respond in writing within twenty (20) days of receipt of LANDOWNER's written request. GRANTEE's approval may be withheld only upon a reasonable determination by GRANTEE that the action as proposed would be inconsistent with the Purpose of this Conservation Easement. In the event the proposed activity affects the CTS Breeding Pond (Area D) or otherwise requires coordination with and/or approval by the FWS pursuant to the Restoration/Management/Monitoring Plan or as specified herein, LANDOWNER shall obtain approval from FWS prior to requesting approval by GRANTEE.

7. PROPERTY MANAGEMENT AND ISSUE RESOLUTION.

(a) **Management Practices.** LANDOWNER recognizes that the Conservation Values of the Easement Area are best protected if LANDOWNER conducts all rangeland operations in accordance with generally accepted, sustainable agricultural practices that address soil and water conservation, erosion control, pest management, nutrient management, and habitat protection. GRANTEE has responsibility under this Conservation Easement to undertake regular monitoring of the Easement Area. The parties agree that, whenever possible, they will take a cooperative approach to monitoring and management of the Easement Area and will conduct joint qualitative monitoring to ensure that the Conservation Values are being protected. This monitoring will be supported through the Baseline Inventory Report and subsequent reviews, using photographs and narrative descriptions, among other evaluation tools. Monitoring will also consider issues such as site potential, weather conditions, unusual economic circumstances, vegetative variety and quality and trends in resource conditions. During the term of the Restoration/Management/Monitoring Plan, restoration practices will be monitored additionally by the GRANTEE.

(b) **Management Plan.** The Restoration/Management/Monitoring Plan includes a restoration plan for the CTS Breeding Pond and certain monitoring and management requirements to further the Purpose and Conservation Values of this Conservation Easement. The purpose of the restoration plan is to repair and rehabilitate the CTS Breeding Pond by re-grading and stabilizing the berm, excavating and re-grading the pond to improve water-holding capacity, creating an approximately three hundred foot buffer zone for the pond and re-vegetating Area D of Attachment "C", as necessary. The management and monitoring requirements in the Plan are intended to ensure that the efforts to create a viable breeding pond for the CTS are as successful as possible and that the Easement Area is managed to provide habitat for the CTS. LANDOWNER, GRANTEE and FWS shall cooperate in the implementation of the Plan for the Easement Area. Upon completion of the restoration plan and the monitoring requirements in the Plan, the Plan shall be extinguished. Subsequent to extinguishment of the Plan, in the event GRANTEE identifies specific circumstances related to LANDOWNER's land use or agricultural practices that, in GRANTEE's view, require improvement to protect the Conservation Values, GRANTEE may require a supplemental written management plan to be prepared by LANDOWNER. In such an event, LANDOWNER

shall cooperate with GRANTEE in the implementation of the management plan. Otherwise, all monitoring and preservation activities for the Easement Area shall be governed by the terms of this Conservation Easement.

(c) **Mediation and Arbitration.** If a dispute arises between the parties concerning the consistency of any existing or proposed use, structure or activity with the language and purpose of this Conservation Easement, and if the parties agree, the dispute may be mediated by one to three persons familiar with agricultural and conservation practices and conservation easements in Santa Barbara County. If the parties agree, they may next request arbitration, supervised by the Santa Barbara County Superior Court, unless extraordinary relief or injunction is necessary to protect against irreparable injury as provided in herein.

(d) **Judicial Enforcement.** If, in GRANTEE's judgment, substantial resource damage is threatened or is occurring, or if GRANTEE finds what it considers to be a violation of any provision of the Conservation Easement that, in GRANTEE's judgment, cannot be satisfactorily addressed through the processes set forth in the preceding subsection, GRANTEE has the right to bypass those processes and to instead pursue appropriate legal action; provided, that except when an ongoing or imminent violation could substantially diminish or impair the Conservation Values of the Easement Area, or the parties have already met and discussed the violation, GRANTEE shall give LANDOWNER written notice of the violation and, not later than fourteen (14) days after the delivery of such written notice, the parties shall meet to discuss the circumstances of the violation and to attempt to agree on appropriate corrective action. If the parties are unable to agree on corrective action, GRANTEE may demand corrective action sufficient to cure the violation and, where the violation involves injury to the Easement Area resulting from any use or activity inconsistent with the Purpose of this Conservation Easement, to restore that portion of the Easement Area so injured.

(e) **Injunctive Relief.** If LANDOWNER fails to cure the violation within a thirty (30) day period after receipt of notice thereof from GRANTEE, or fails to continue diligently to cure such violation until finally cured, GRANTEE may bring an action at law or in equity in a court of competent jurisdiction to enforce the terms of this Conservation Easement, to enjoin the violation by temporary or permanent injunction, to recover any damages to which it may be entitled for violation of the terms of this Conservation Easement or injury to any Conservation Values, including damages for any loss thereof, and to require the restoration of the Easement Area to the condition that existed prior to any such injury.

(f) **Damages.** GRANTEE shall be entitled to recover damages for violation of the terms of this Conservation Easement or injury to any of the Conservation Values protected by this Conservation Easement, including, without limitation, damages for the loss of Conservation Values. Without limiting LANDOWNER's liability therefor, GRANTEE, in its sole discretion, may apply any damages recovered to the cost of undertaking any corrective action in the Easement Area.

(g) **Emergency Enforcement.** If GRANTEE, in its sole discretion, determines that circumstances require immediate action to prevent or mitigate significant

damage to the protected values of the Easement Area, GRANTEE may pursue its remedies under this Paragraph without waiting for the period provided for correction to expire.

(h) **Scope of Relief.** GRANTEE's rights under this Paragraph shall apply equally to threatened as well as actual violations of the terms of this Conservation Easement, and LANDOWNER agrees that GRANTEE's remedies at law for any violation of the terms hereof are inadequate and that GRANTEE shall be entitled to the injunctive relief described in this Paragraph, both prohibitive and mandatory, in addition to such other relief to which COUNTY may be entitled, including specific performance of the terms of this Conservation Easement, without the necessity of proving either actual damages or the inadequacy of otherwise available legal remedies. GRANTEE's remedies described in this Paragraph shall be cumulative and shall be in addition to all remedies now or hereafter existing at law or in equity. Furthermore, the provisions of California Civil Code Section 815 *et seq.*, are incorporated herein by this reference and this Conservation Easement is made subject to all of the rights and remedies set forth therein. GRANTEE retains the discretion to choose the appropriate method to enforce the provisions of this Conservation Easement, and shall not be required to exhaust the provisions of one subsection hereof in order to be entitled to the benefits of another.

(i) **Expert Assistance.** The opinions of any appropriate consultant or expert engaged to assist the parties in the resolution of any claim of injury to any Conservation Value shall be admissible in any judicial proceedings conducted with respect to that asserted violation.

(j) **Costs of Enforcement.** Any reasonable costs incurred by COUNTY in non-judicial enforcement of the terms of this Conservation Easement against LANDOWNER, and any costs of restoration necessitated by LANDOWNER's violation of the terms hereof shall be borne by LANDOWNER; provided however that LANDOWNER shall not be responsible for the costs of restoration necessary to remedy damage to the Easement Area caused by the conduct of third parties acting without permission or knowledge of LANDOWNER. The prevailing party in any judicial action brought pursuant to the provisions of this Conservation Easement, including without limitation mediation or arbitration, shall be entitled to recovery of its reasonable costs of suit, including, without limitation, attorneys' and experts' fees, from the other party.

(k) **Enforcement Discretion.** Enforcement of the terms of this Conservation Easement shall be at the discretion of GRANTEE, and any forbearance by GRANTEE to exercise its rights hereunder shall not be deemed or construed to be a waiver by GRANTEE of such rights or of any subsequent breach of the same or any other terms of this Conservation Easement, or of its rights hereunder. No delay or omission by GRANTEE in the exercise of any right or remedy upon any breach by LANDOWNER shall impair such right or remedy or be construed as a waiver, and LANDOWNER hereby waives any defense of laches, estoppel or prescription.

(l) **Acts Beyond LANDOWNER's Control.** Nothing contained in this Conservation Easement shall be construed to entitle LAND TRUST to bring any action against LANDOWNER for any injury to or change in the Easement Area resulting from causes beyond LANDOWNER's control, including, without limitation, fire, flood, storm and earth movement, or actions by persons outside the control and knowledge of LANDOWNER, or from any prudent

action by LANDOWNER under emergency conditions, to prevent, abate or mitigate significant injury to the Easement Area resulting from such causes.

8. NO PUBLIC DEDICATION OR PUBLIC ACCESS. Nothing contained in this Conservation Easement shall be deemed to be a gift or dedication of any portion of the Property for use by the general public. This instrument does not convey a general right of access to the public.

9. LANDOWNER'S TITLE WARRANTY. LANDOWNER represents and warrants that LANDOWNER has good fee simple title to the Property, subject to such liens, encumbrances and matters of record as may be approved by GRANTEE, and hereby promises to defend the same against all claims that may be made against it. GRANTEE's failure to object to any item or exception shown on a preliminary title report of the Property prepared by Chicago Title Company prior to the Closing Date shall constitute an approval by GRANTEE of such item or exception. LANDOWNER may grant any subsequent conservation easements on the Property provided that such easements do not interfere with or reduce the Conservation Values of this Conservation Easement. GRANTEE shall be notified at least ninety days in advance, in writing, of any proposed conservation or other easement for the Property, which notice shall include the proposed easement.

10. ENVIRONMENTAL PROVISIONS.

(a) LANDOWNER's Environmental Warranty. LANDOWNER warrants that LANDOWNER has no knowledge of a release or threatened release of hazardous substances or wastes on or that could affect the Easement Area and, as more generally set out in paragraph 5(c) above, agrees to indemnify, defend, protect and hold GRANTEE, its directors, officers, employees, agents, and contractors, and their heirs, successors, and assigns, harmless from and against all litigation costs, demands, penalties, damages, liabilities, claims or expenses (including reasonable attorney fees) arising from or connected with any release of hazardous waste or violation of federal, state, or local environmental laws as a result of or arising out of the activities of LANDOWNER in the Easement Area, or any breach of this Conservation Easement.

(b) GRANTEE Not an Owner, Operator, or Responsible Party. Notwithstanding any other provision herein to the contrary, the parties do not intend this Conservation Easement to be construed such that it creates in or gives the GRANTEE:

(i) the obligations or liability of an "owner" or "operator" as those words are defined and used in applicable environmental laws, including, without limitation, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended (42 USC § 9601 *et seq.* and hereinafter "CERCLA");

(ii) the obligations or liability of a person described in 42 USC § 9607(a)(3) or (4);

(iii) the obligations of a responsible person under any applicable environmental laws;

(iv) the right to investigate and remediate any hazardous materials associated with the Easement Area; or

(v) any control over LANDOWNER's ability to investigate, remove, remediate, or otherwise clean up any hazardous materials associated with the Easement Area.

11. TRANSFER BY GRANTEE. GRANTEE shall have the right to transfer this Conservation Easement to any public or non-profit agency authorized to hold conservation easements pursuant to Section 815.3 of the California Civil Code, upon written approval of the FWS, which approval shall not be unreasonably withheld.

(a) Voluntary Transfer. In selecting an appropriate transferee entity, preference will be given to a qualified agency or organization with an agricultural conservation purpose that has board, staff, or consultants with practical agricultural management experience, which agency or organization expressly agrees to assume the responsibility imposed on the GRANTEE by this Conservation Easement. If such agency or organization cannot be found, or is not suitable for any reason, then another qualified agency or organization that expressly agrees to assume the responsibility imposed on the GRANTEE by this Conservation Easement may be selected. GRANTEE shall provide to LANDOWNER and USFWS notice of any proposed transfer, information about proposed transferee(s), and opportunity for input. If more than one qualified agency or organization meets the foregoing criteria and all are equally capable of effecting the purposes of this Conservation Easement, GRANTEE may select the organization that shall be the transferee. As a condition of such transfer or assignment, GRANTEE shall require that the Conservation Purpose set forth herein shall be carried out and enforced in perpetuity. Notice of such restrictions, including the Conservation Easement, shall be recorded in the GRANTEE where the Property is located. The failure of GRANTEE to perform any action required by this paragraph shall not impair the validity of this Conservation Easement or its enforcement in any way.

(b) Involuntary Transfer. If GRANTEE's transferee entity ever ceases to exist or no longer qualifies under applicable state law or fails to perform its responsibilities under this Easement, FWS shall have the right to seek transfer, through a court of competent jurisdiction, of this Conservation Easement to another qualified organization having substantially similar purposes that agrees to assume the responsibilities imposed on GRANTEE by this Conservation Easement. FWS shall provide to GRANTEE and to LANDOWNER notice of and an opportunity to participate in the court proceedings. As a condition of such transfer, FWS shall require that the Conservation Purpose set forth herein shall be carried out and enforced in perpetuity. Upon court approval of such Involuntary Transfer, GRANTEE shall pay to the successor qualified organization that amount of funds *[which amount shall not exceed \$49,800]* received for its Stewardship Fund endowment pursuant Settlement Agreement referenced in Recital G above.

12. **LANDOWNER TRANSFER OF PROPERTY.** Any time the Property or any interest in it is transferred by LANDOWNER to any third party, LANDOWNER shall notify GRANTEE and FWS in writing prior to the transfer of the Property, and the deed of conveyance shall expressly refer to this Conservation Easement and incorporate the terms of this Conservation Easement. Such transfer shall not result in a merger of the Conservation Easement and the Property in a single Property owner (thereby extinguishing the Conservation Easement) if no method or mechanism deemed adequate to preserve, protect, and sustain the Easement Area in perpetuity has been established. Failure to notify GRANTEE or include the required reference to this Conservation Easement in the deed shall not affect the continuing validity and enforceability of this Conservation Easement.

13. **AMENDMENT.** This Conservation Easement may be amended only with the written consent of GRANTEE and LANDOWNER and FWS. Any such amendment shall be consistent with the Purpose of this Conservation Easement and shall comply with California Civil Code Section 815 *et seq.*, and any regulations promulgated in accordance with these statutes, and with the adopted amendment policy of GRANTEE. GRANTEE shall notify FWS and provide an opportunity for their review and approval prior to approving any amendment. LANDOWNER shall reimburse GRANTEE for its reasonable expenses associated with review and approval of any amendment initiated by LANDOWNER.

14. **CONDEMNATION.** If all or any part of the Easement Area is taken by exercise of the power of eminent domain, or acquired by purchase in lieu of condemnation, whether by public, corporate or other authority, so as to terminate this Conservation Easement, in whole or in part, LANDOWNER and GRANTEE shall act jointly to recover the full value of the interests in the Easement Area subject to the taking or in lieu purchase and all direct or incidental damages resulting therefrom. All expenses reasonably incurred by LANDOWNER and GRANTEE in connection with the taking or in lieu purchase shall be paid out of the amount recovered. GRANTEE's share of the balance shall be determined by the ratio of the value of the Conservation Easement to the value of the Easement Area unencumbered by this Conservation Easement. If only a portion of the Easement Area is subject to such exercise of eminent domain, this Conservation Easement shall remain in effect as to all other portions of the Easement Area.

15. **VALUATION.** This Conservation Easement constitutes a real property interest immediately vested in GRANTEE. The parties stipulate that this Conservation Easement has a fair market value determined by multiplying (a) the fair market value of the Easement Area unencumbered by the easement (minus any increase in value attributable to improvements made after the date of this Conservation Easement) by (b) the ratio of the value of the Conservation Easement to the value of the Easement Area unencumbered by the easement.

16. **LANDOWNER RESPONSIBILITY.** LANDOWNER shall, not later than two years from the date of recordation of this easement, subordinate any existing encumbrance to this easement or remove the existing encumbrances of record such that this easement is senior in title to any record encumbrance.

17. **GENERAL PROVISIONS.**

(a) **Controlling Law.** The interpretation and performance of this Conservation Easement shall be governed by the laws of the State of California and applicable Federal law, including the ESA.

(b) **Liberal Construction.** Any general rule of construction to the contrary notwithstanding, this Conservation Easement shall be liberally construed in favor of the grant to effect the purpose of this Conservation Easement. If any provision in this instrument is found to be ambiguous, an interpretation consistent with the purposes of this Conservation Easement that would render the provision valid shall be favored over any interpretation that would render it invalid.

(c) **Severability.** If any provision of this Conservation Easement, or the application thereof to any person or circumstance, is found to be invalid, the remainder of the provisions hereof, or the application of such provision to persons or circumstances other than those as to which it is found to be invalid, as the case may be, shall not be affected thereby.

18. **PERPETUAL DURATION.** The easement created by this instrument shall be a servitude running with the land in perpetuity. Every provision of this Conservation Easement that applies to LANDOWNER and GRANTEE shall also apply to and be binding upon their respective agents, heirs, beneficiaries, executors, administrators, successors and assigns.

19. **NOTICES.** Any notice, demand, request, consent, approval or communication that either party desires or is required to give to the other shall be in writing and either served personally or sent by United States certified mail, return receipt requested, or by another common method or service where receipt is confirmed, addressed as follows or such other address as either party from time to time shall designate by written notice to the other.

21. **LAWS CURRENTLY IN EFFECT.** All references in this Conservation Easement to statutes, regulations and other laws shall be deemed to refer to those statutes, regulations and laws currently in effect, or as amended (or any successor provision then applicable).

22. **ENTIRE AGREEMENT.** This instrument with the Attachments incorporated herein sets forth the entire agreement of the parties with respect to the Easement Area and supersedes all prior discussions, negotiations, understandings or agreements relating to the Easement Area, all of which are herein merged.

23. **COUNTERPARTS.** The parties may execute this instrument in two or more counterparts, which shall, in the aggregate, be signed by both parties; each counterpart shall be deemed an original instrument as against any party who has signed it.

24. **ATTACHMENTS.** The Attachments attached hereto are incorporated herein by this reference:

- ATTACHMENT B: Easement Area Legal Description
- ATTACHMENT C: Conservation Easement Map and Easement Areas A, B, C and D

25. **EFFECTIVE DATE.** This Conservation Easement is effective upon recordation in the Official Records of the County of Santa Barbara, State of California.

26. **THIRD PARTY BENEFICIARY AND ACCESS.** LANDOWNER and GRANTEE acknowledge that FWS is neither Grantor nor Grantee of this Conservation Easement, but it is a third-party beneficiary of this Conservation Easement with rights of access to the Easement Area for monitoring of conservation activities contemplated by this Conservation Easement and with the right to enforce GRANTEE's obligations pursuant to this Conservation Easement, with such right of enforcement to include, but not be limited to, the Involuntary Transfer provision stated in Paragraph 11.(b).

Legal Description

Being all that portion of the North one-half of the Southeast one-quarter of Section 9, Township 7 North, Range 33 West, San Bernardino Meridian, in the County of Santa Barbara, State of California, according to the official plat thereof, more particularly described as follows:

Area A

Commencing at the southeast corner of the Northwest one-quarter of the Southeast one-quarter of said Section 9, said corner being denoted as a set ¼" iron pipe with tag "LS 3146" on the map filed in Book 147 of Records of Survey, Page 37, in the office of said County Recorder; thence N88°31'30"W, along the North line of Southwest one-quarter of the Southeast one-quarter of said Section 9, 1307.59 feet to a point in the West line of the North one-half of the Southeast one-quarter of said Section 9, said point being denoted as a set ¼" iron pipe with tag "LS 3146" as denoted on said map; thence N00°03'15"E, along said West line of the North one-half of the Southeast one-quarter of Section 9, 1330.18 feet to the Northwest corner of said North one-half of the Southeast one-quarter of Section 9; thence S88°34'32"E, along the North line of said North one-half of the Southeast one-quarter of Section 9, 209.26 feet to the TRUE POINT OF BEGINNING; thence,

- First S88°34'32"E continuing along said North line of the North one-half of the Southeast one-quarter of Section 9, 1258.01' to a point in the center of an existing dirt road running in a northwesterly/southeasterly direction along the spine of an existing ridgeline; thence,
- Second S05°22'04"E, along the center of said dirt road and said ridgeline, 34.87 feet to an angle point therein; thence,
- Third S10°28'23"E, continuing along said dirt road and ridgeline, 71.83 feet to an angle point therein; thence,
- Fourth S12°07'42"E, continuing along said dirt road and ridgeline, 115.60 feet to the beginning of a non-tangent curve concave northwesterly having a radius of 300.00 feet, the radial center of which bears S24°38'48"W; thence,
- Fifth Departing said dirt road and ridgeline, westerly, southwesterly, and southerly along the arc of said curve a distance of 606.36 feet, through a central angle of 115°48'24"; thence,
- Sixth Departing said curve N60°18'12"W, 520.50 feet to an angle point; thence,
- Seventh N43°57'50"W, 247.19 feet to an angle point; thence,
- Eighth N75°58'03"W, 246.23 feet to an angle point; thence,
- Ninth S03°07'06"W, 278.28 feet to an angle point; thence,
- Tenth S05°45'31"W, 280.80 feet to an angle point; thence,
- Eleventh N77°21'26"W, 160.12 feet to a point in the existing barbed wire fence; thence,
- Twelfth N18°48'06"E along said barbed wire fence and its northeasterly prolongation, 586.40 feet to the True Point of Beginning.

Containing 8.45 acres more or less

Area B

Commencing at the southeast corner of the Northwest one-quarter of the Southeast one-quarter of said Section 9, said corner being denoted as a set ¼" iron pipe with tag "LS 3146" on the map filed in Book 147 of Records of Survey, Page 37, in the office of said County Recorder; thence N88°31'30"W, along the North line of Southwest one-quarter of the Southeast one-quarter of said Section 9, 1307.59 feet to a point in the West line of the North one-half of the Southeast one-quarter of said Section 9, said point being denoted as a set ¼" iron pipe with tag "LS 3146" as denoted on said map; thence N00°03'15"E, along the West line of the North one-half of the Southeast one-quarter of said Section 9, 1330.18 feet to the Northwest corner of said North one-half of the Southeast one-quarter of Section 9 and the TRUE POINT OF BEGINNING; thence,

- First S88°34'32"E along the north line of said North one-half of the Southeast one-quarter of Section 9, 159.66 feet to an angle point; thence,
- Second S43°33'28"W, parallel with and 20.00 feet northwesterly of the centerline of an existing dirt road, 231.86 feet to a point in said West line of said North one-half of the Southeast one-quarter of Section 9; thence,
- Third N00°03'15"E, along said West line of said North one-half of the Southeast one-quarter of Section 9, 171.99 feet to the Point of Beginning.

Containing 0.32 acres more or less

Area C

Commencing at the southeast corner of the Northwest one-quarter of the Southeast one-quarter of said Section 9, said corner being denoted as a set ¼" iron pipe with tag "LS 3146" on the map filed in Book 147 of Records of Survey, Page 37, in the office of said County Recorder; thence N88°31'30"W, along the North line of Southwest one-quarter of the Southeast one-quarter of said Section 9, 1307.59 feet to a set ¼" iron pipe with tag "LS 3146" as denoted on said map; thence, N00°03'15"E along said West line of the North one-half of the Southeast one-quarter of Section 9, 833.25 feet to the True Point of Beginning; thence,

- First N00°03'15"E, along said West line of the North one-half of the Southeast one-quarter of Section 9, 266.84 feet to an angle point; thence,
- Second N43°33'28"E, parallel with and 20.00 feet southeasterly of the centerline of an existing dirt road, 204.80 feet to an angle point; thence,
- Third S18°48'06"W parallel with and 40.00 feet northwesterly of an existing barbed wire fence, 438.65 feet to the True Point of Beginning.

Containing 0.43 acres more or less

Area D

Commencing at the southeast corner of the Northwest one-quarter of the Southeast one-quarter of said Section 9, said corner being denoted as a set ¼" iron pipe with tag "LS 3146" on the map filed in Book 147 of Records of Survey, Page 37, in the office of said County Recorder; thence N88°31'30"W, along the North line of Southwest one-quarter of the Southeast one-quarter of said Section 9, 1307.59 feet to a point in the West line of the North one-half of the Southeast one-quarter of said Section 9, said point being denoted as a set ¼" iron pipe with tag "LS 3146" as denoted on said map; thence N00°03'15"E, along said West line of the North one-half of the Southeast one-quarter of Section 9, 1330.18 feet to the Northwest corner of said North one-half of the Southeast one-quarter of Section 9; thence S88°34'32"E, along the North line of said North one-half of the Southeast one-quarter of Section 9, 1467.27 feet to a point in the center of an existing dirt road running in a northwesterly/southeasterly direction along the spine of an existing ridgeline; thence, departing said north line S05°22'04"E, along the center of said dirt road and said ridgeline, 34.87 feet to an angle point therein; thence, S10°28'23"E, continuing along said dirt road and ridgeline, 71.83 feet to an angle point therein; thence, S12°07'42"E, continuing along said dirt road and ridgeline, 115.60 feet to the beginning of a non-tangent circular curve having a radius of 300.00 feet, the radial center of which bears S24°38'48"W, and being the **TRUE POINT OF BEGINNING**; thence, along the arc of said curve through a central angle of 360°00'00" for a length of 1884.96' feet to the True Point of Beginning.

Containing 6.48 acres more or less

End of Descriptions

A visual depiction of the afore described areas is shown on the "Exhibit Sketch" attached hereto and by reference incorporate herein.

This description was prepared by me or under my direction in conformance with the requirements of the Professional Land Surveyor's Act this 13th day of October, 2009.
