## **EXECUTIVE SUMMARY**

The Santa Barbara County Fire Department has the goal of providing a Backup Dispatch Center (BUD) for the fire dispatch that can be activated if there is an event that renders the primary dispatch center inactive or requires increased capacity. The County would like to locate the Backup Dispatch Center in the North county area to provide increased redundancy as the current and proposed primary dispatch is located in the South portion of the County. Locating the Backup Dispatch Center in the North County area increased the likelihood that both facilities will not be effected at the same time and provides direct access to the areas of North County.

The Santa Barbara County Fire Department and the Santa Maria Police Department are investigating the opportunity to collaborate on locating the Backup Dispatch Center for Santa Barbara County in a currently unused section of the Santa Maria Police Station located at 1111 Betteravia Road in Santa Maria. The Santa Maria Police Department would also like to develop a portion of the space to be a training room for their department.

The Police Station is equipped with an on site antenna, server room, and emergency generator to serve the police department, including the on site Santa Maria Police Department dispatch center. The server room, electrical system and emergency generator are identified by the police department to have adequate space to add the Santa Barbara Backup Dispatch Center functions.

The following layouts include architectural, electrical and mechanical analysis of the space to include consoles and video display monitors for the Backup Dispatch Center and training room configuration with tables, chairs and monitors. The space also provides a movable dividing wall that can separate the space into the two areas.

The following study will provide the Santa Barbara County Fire Department and Santa Maria Police Department with the layout and analysis to determine if they will move forward with the next steps of collaboration on this facility.

## ACKNOWLEDGMENTS

Substantial contributions to this project were made by both the County of Santa Barbara and RRM Design Group and their Consultants. Below is a list of notable individuals involved in preparing this report:

## **ACKNOWLEDGMENTS**

RRM Design Group acknowledges the team effort it took to develop this report. We appreciate the leadership, dedication, and time that County staff contributed to the comprehensiveness of the report and vision for achieving the project.

## BACKUP DISPATCH CENTER - BUD SPACE NEEDS OUTLINE

August 11, 2021

SITE	OPERATIONS	SPACE ATTRIBUTES
	Site Access	The Backup Dispatch (BUD) will utilize the parking and site access of the exisitng Santa Maria Police
	Visitor and Public Parking	Existing visitor parking exists that would access the lobby of the Santa Maria Police Department
	Emergency Generator	The exising diesel generator sized to support the Santa Maria Police Department with the added Backup Dispatch Center
	Security Fence	The existing Santa Maria Police Station has a secured yard with fencing and access gate
	Trash and Recycling	The BUD will utilize the exisitng trash and recycling of the Santa Maria Police Department
	Radio Antenna	The BUD will utilize the exisitng antenna of the Santa Maria Police Department. It is sized to accommodate additional equipment.
	Site Lighting	Site Lighting is provided in the existing parking lot of the Santa Maria Police Department but should be verified to provide needed light at BUD exits and entries.

SANTA BARBARA COUNTY Bockup Dispatch Facility

**MECHANICAL LAYOUT** 

#### NARRATIVE

- Existing space is "Open Storage"; Demo and remove any existing mechanical serving the Area of Work.
- Proposed New Zone Plans overlayed on RCP
- Estimated 5—ton packaged roof top unit is to serve each space
- Air distribution is to be routed in the ceiling space if there is enough space, otherwise will be routed on the roof.
- 5 PSI MPG (1750 CFH) available on the roof where RTU's are proposed. Provide a new regulator and connect.
- Estimated 1.5 ductless split system with highwall mounted fan coil (IDU) and roof mounted condensing unit (ODU) to serve Comm Closet.
