Santa Barbara County Board of Supervisors  
105 East Anapamu Street  
Santa Barbara, CA 93101

Dear Santa Barbara County Board of Supervisors:

For years reproductive health centers across the country, including our local Planned Parenthood health centers, have experienced ongoing harassment, threats, and violence at their clinics, and most recently defunding efforts from the federal government. It is more critical now than ever to stand with Planned Parenthood and support the reproductive care they provide to thousands of low-income Santa Barbara County residents.

Planned Parenthood is one of the state's largest providers of women's and reproductive health care services. They provide comprehensive health care services, including well-woman exams, birth control, testing and treatment of sexually transmitted infections and HIV, pregnancy tests, life-saving cancer screenings, and abortion services to more than 1 million Californians annually.

In Santa Barbara County, through their Santa Maria and Santa Barbara health centers, Planned Parenthood served more than 9,000 patients last year; 70% of whom were at or below the federal poverty level. They have also provided comprehensive sexual health education to more than 15,000 women, men and teens in Santa Barbara County through the federal government's Title X Family Planning Program.

We hope that you recognize that some anti-abortion extremists have recently released heavily edited videos that intentionally misrepresent the facts about Planned Parenthood in order to deceive the public and discredit this organization. These imposters have a real goal of banning all access to abortion, to defund Planned Parenthood, and thereby prevent women, men and teens from receiving birth control, life-saving cancer screenings and accessing other healthcare services. As a result, Congress recently failed at an attempt to ban any federal health care funding from reaching Planned Parenthood, despite the fact that \$0.00 federal dollars support access to abortion.

These types of politically-motivated attacks will needlessly jeopardize the health and well-being of millions of Americans, and at a local level, lead to disastrous public health outcomes. I urge the County to express its support for comprehensive reproductive health care access provided by Planned Parenthood and to oppose efforts to eliminate federal funding for Planned Parenthood and Title X family planning programs.

Sincerely,

Name:	<u>Sandra Sterling</u>
Address:	<u>1502 Manitou Rd.</u>

Santa Barbara County Board of Supervisors  
105 East Anapamu Street  
Santa Barbara, CA 93101

Dear Santa Barbara County Board of Supervisors:

For years reproductive health centers across the country, including our local Planned Parenthood health centers, have experienced ongoing harassment, threats, and violence at their clinics, and most recently defunding efforts from the federal government. It is more critical now than ever to stand with Planned Parenthood and support the reproductive care they provide to thousands of low-income Santa Barbara County residents.

Planned Parenthood is one of the state's largest providers of women's and reproductive health care services. They provide comprehensive health care services, including well-woman exams, birth control, testing and treatment of sexually transmitted infections and HIV, pregnancy tests, life-saving cancer screenings, and abortion services to more than 1 million Californians annually.

In Santa Barbara County, through their Santa Maria and Santa Barbara health centers, Planned Parenthood served more than 9,000 patients last year; 70% of whom were at or below the federal poverty level. They have also provided comprehensive sexual health education to more than 15,000 women, men and teens in Santa Barbara County through the federal government's Title X Family Planning Program.

We hope that you recognize that some anti-abortion extremists have recently released heavily edited videos that intentionally misrepresent the facts about Planned Parenthood in order to deceive the public and discredit this organization. These imposters have a real goal of banning all access to abortion, to defund Planned Parenthood, and thereby prevent women, men and teens from receiving birth control, life-saving cancer screenings and accessing other healthcare services. As a result, Congress recently failed at an attempt to ban any federal health care funding from reaching Planned Parenthood, despite the fact that \$0.00 federal dollars support access to abortion.

These types of politically-motivated attacks will needlessly jeopardize the health and well-being of millions of Americans, and at a local level, lead to disastrous public health outcomes. I urge the County to express its support for comprehensive reproductive health care access provided by Planned Parenthood and to oppose efforts to eliminate federal funding for Planned Parenthood and Title X family planning programs.

Sincerely,

Santa Barbara County Board of Supervisors  
105 East Anapamu Street  
Santa Barbara, CA 93101

Dear Santa Barbara County Board of Supervisors:

For years reproductive health centers across the country, including our local Planned Parenthood health centers, have experienced ongoing harassment, threats, and violence at their clinics, and most recently defunding efforts from the federal government. It is more critical now than ever to stand with Planned Parenthood and support the reproductive care they provide to thousands of low-income Santa Barbara County residents.

Planned Parenthood is one of the state's largest providers of women's and reproductive health care services. They provide comprehensive health care services, including well-woman exams, birth control, testing and treatment of sexually transmitted infections and HIV, pregnancy tests, life-saving cancer screenings, and abortion services to more than 1 million Californians annually.

In Santa Barbara County, through their Santa Maria and Santa Barbara health centers, Planned Parenthood served more than 9,000 patients last year; 70% of whom were at or below the federal poverty level. They have also provided comprehensive sexual health education to more than 15,000 women, men and teens in Santa Barbara County through the federal government's Title X Family Planning Program.

We hope that you recognize that some anti-abortion extremists have recently released heavily edited videos that intentionally misrepresent the facts about Planned Parenthood in order to deceive the public and discredit this organization. These imposters have a real goal of banning all access to abortion, to defund Planned Parenthood, and thereby prevent women, men and teens from receiving birth control, life-saving cancer screenings and accessing other healthcare services. As a result, Congress recently failed at an attempt to ban any federal health care funding from reaching Planned Parenthood, despite the fact that \$0.00 federal dollars support access to abortion.

These types of politically-motivated attacks will needlessly jeopardize the health and well-being of millions of Americans, and at a local level, lead to disastrous public health outcomes. I urge the County to express its support for comprehensive reproductive health care access provided by Planned Parenthood and to oppose efforts to eliminate federal funding for Planned Parenthood and Title X family planning programs.

Sincerely,

Name: Kathleen M. Zeitsoff

Address: 215 Bath St. B-6

Santa Barbara County Board of Supervisors  
105 East Anapamu Street  
Santa Barbara, CA 93101

Dear Santa Barbara County Board of Supervisors:

For years reproductive health centers across the country, including our local Planned Parenthood health centers, have experienced ongoing harassment, threats, and violence at their clinics, and most recently defunding efforts from the federal government. It is more critical now than ever to stand with Planned Parenthood and support the reproductive care they provide to thousands of low-income Santa Barbara County residents.

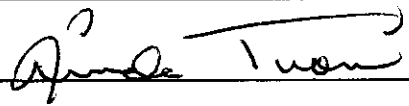

Planned Parenthood is one of the state's largest providers of women's and reproductive health care services. They provide comprehensive health care services, including well-woman exams, birth control, testing and treatment of sexually transmitted infections and HIV, pregnancy tests, life-saving cancer screenings, and abortion services to more than 1 million Californians annually.

In Santa Barbara County, through their Santa Maria and Santa Barbara health centers, Planned Parenthood served more than 9,000 patients last year; 70% of whom were at or below the federal poverty level. They have also provided comprehensive sexual health education to more than 15,000 women, men and teens in Santa Barbara County through the federal government's Title X Family Planning Program.

We hope that you recognize that some anti-abortion extremists have recently released heavily edited videos that intentionally misrepresent the facts about Planned Parenthood in order to deceive the public and discredit this organization. These imposters have a real goal of banning all access to abortion, to defund Planned Parenthood, and thereby prevent women, men and teens from receiving birth control, life-saving cancer screenings and accessing other healthcare services. As a result, Congress recently failed at an attempt to ban any federal health care funding from reaching Planned Parenthood, despite the fact that \$0.00 federal dollars support access to abortion.

These types of politically-motivated attacks will needlessly jeopardize the health and well-being of millions of Americans, and at a local level, lead to disastrous public health outcomes. I urge the County to express its support for comprehensive reproductive health care access provided by Planned Parenthood and to oppose efforts to eliminate federal funding for Planned Parenthood and Title X family planning programs.

Sincerely,

Name: Martha MacGillivray

These types of politically-motivated attacks will needlessly jeopardize the health and well-being of millions of Americans, and at a local level, lead to disastrous public health outcomes. I urge the County to express its support for comprehensive reproductive health care access provided by Planned Parenthood and to oppose efforts to eliminate federal funding for Planned Parenthood and Title X family planning programs.

Sincerely,

Santa Barbara, CA 93101

Dear Santa Barbara County Board of Supervisors:

For years reproductive health centers across the country, including our local Planned Parenthood health centers, have experienced ongoing harassment, threats, and violence at their clinics, and most recently defunding efforts from the federal government. It is more critical now than ever to stand with Planned Parenthood and support the reproductive care they provide to thousands of low-income Santa Barbara County residents.

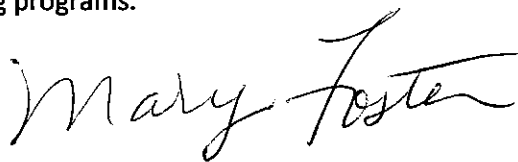

Planned Parenthood is one of the state's largest providers of women's and reproductive health care services. They provide comprehensive health care services, including well-woman exams, birth control, testing and treatment of sexually transmitted infections and HIV, pregnancy tests, life-saving cancer screenings, and abortion services to more than 1 million Californians annually.

In Santa Barbara County, through their Santa Maria and Santa Barbara health centers, Planned Parenthood served more than 9,000 patients last year; 70% of whom were at or below the federal poverty level. They have also provided comprehensive sexual health education to more than 15,000 women, men and teens in Santa Barbara County through the federal government's Title X Family Planning Program.

We hope that you recognize that some anti-abortion extremists have recently released heavily edited videos that intentionally misrepresent the facts about Planned Parenthood in order to deceive the public and discredit this organization. These imposters have a real goal of banning all access to abortion, to defund Planned Parenthood, and thereby prevent women, men and teens from receiving birth control, life-saving cancer screenings and accessing other healthcare services. As a result, Congress recently failed at an attempt to ban any federal health care funding from reaching Planned Parenthood, despite the fact that \$0.00 federal dollars support access to abortion.

These types of politically-motivated attacks will needlessly jeopardize the health and well-being of millions of Americans, and at a local level, lead to disastrous public health outcomes. I urge the County to express its support for comprehensive reproductive health care access provided by Planned Parenthood and to oppose efforts to eliminate federal funding for Planned Parenthood and Title X family planning programs.

Sincerely,
