

Resilience Hubs Grant Program Guidelines: Feasibility Projects—2021 Final Presentation Slide Deck

This document provides guidance for recipients of PG&E's 2021 Resilience Hubs grants Feasibility Projects in the preparation of a slide deck summarizing their project results and any lessons learned.

Grantees should submit a slide deck to be reviewed in their Q4 meeting with the PG&E grant program project manager.

The slide deck ideally will include:

- Executive Summary (this can double as the write up we put on the program website)
- The problem your project is seeking to address and any other necessary contextual information
- Project's desired outcomes and key strategies to achieve them
- Results of the project, with as much specificity regarding outcomes as possible
- Recommendations about how your project could be scaled to provide benefits in other communities, if applicable
- Project's next steps/further action enabled by or to follow this project
