Dear County Board of Supervisors,

Please support the Goleta Beach Managed Retreat Option that is recommended by Surfrider and the EDC.

It is best for the future of the beach and best for the environment. Beach-goers will love you for it!

Thank you,

Ally Gialketsis

Dear Supervisors,

Please remove the unpermitted rock revetment seawall in order to protect Goleta Beach.

Beaches erode in front of rock revetments. A number of experts including engineer Michael Walther from Coastal Tech and Dr. Orrin Pilkey have written the County that if the rock revetments remain, Goleta Beach will narrow and disappear over time.

All other rock revetments are permitted and would remain, including those in front of the restaurant, pier and other park facilities.

Please protect the park and the beach by removing the damaging rock revetments, relocating at-risk utility lines and parking spaces, and consider installing a cobble berm as a way to add protection for the park without damaging the beach.

Thank you.
