Subject: County Fish and Game Commission hearing today

Importance: High

Dear County Supervisors,

Barbara Urban Creeks Council is a 501(c)3 non profit organization that has worked for the past 25 years to bring about positive change to benefit fish and wildlife by advocating in favor of watershed protections. We wholeheartedly favor the proposed changes to the Commission. It is important to everyone, including those who hunt and fish, to implement changes that will protect our irreplaceable resources. That essential goal can be attained, but important changes to the commission are needed.

Thank you for considering our views,

Eddie Harris
President,
SBUCC
