SB's COVID Mess - Montecito Journal; Jerry Roberts' *Newsmakers*

"I know I am not alone in having friends or family battling COVID – making up a small part of our national tragedy. The more devastating piece for Santa Barbara County are those who are fighting for their next breath in Cottage Hospital after being denied or deemed ineligible for vaccination by the County. In the last two weeks, I know of six new cases of COVID, four hospitalized, and three who were excluded from the County's rigid tier system because they were not yet 75. Three of them have multiple co-morbidities and at least two contracted the virus while at the hospital for outpatient treatments...."

- The Hispanic population of Santa Barbara County has been disproportionately impacted by COVID-19 as it relates to rates of hospitalizations and deaths.
- I have submitted comments for the Connect 2050 RTP document and EIR. I am requesting the EIR analyze the impacts of county and state housing and transportation policies on the Hispanic population in relation to COVID-19.
- Any attempt by any county government elected official or employee to threaten or intimidate a citizen into not discussing civil rights and environmental justice issues with their elected representative is a serious violation of that citizen's civil rights.
- The United States Department of Justice Civil Rights Division makes it very easy for a citizen to file a formal complaint when any elected government official or employee attempts to threaten or intimidate that citizen into not discussing civil rights and environmental justice issues with that citizen's elected representative.
