Dear Honorable County Supervisors:

We support "Goleta Beach 2.0" as an innovative plan to protect and enhance Goleta Beach County Park.

The Parks Department's new plan preserves and expands the beach by over an acre!

It adds recreational facilities like kayak rentals and trails and removes the unpermitted rock seawalls which damage the beach.

By relocating the sewer and utility lines out of the "critical erosion zone" the plan is a long-term solution.

The County's sewer line should be moved all the way back to Highway 217 to avoid future sewage spills on the beach and avoid the need to consider a controversial "backstop revetment" seawall which would damage the beach.

Goleta Beach 2.0 protects the Park and the environment and is far less costly than prior proposals which have been rejected by the Coastal Commission.

We urge you to support Goleta Beach Park and direct staff to pursue all options to move the sewer line further inland.

Sincerely,

Brock Roverud

Dear Honorable County Supervisors:

I am writing in support of the Goleta Beach 2.0 plan to protect and enhance Goleta Beach County Park. The plan is something I have supported since the decision last year to fix erosion at the beach. However we are at a crucial moment in the process in which a diligent and informed decision must be made to ensure a long term solution in the plan and not a temporary fix.

The sewer and utility lines in the critical erosion zone pose a threat to ensuring that the plan can provide a long term solution to erosion. Any seawall needed to protect these lines will result in the return of erosion and ultimately defeat what the plan was set in place to fix. As the adage of carpentry goes, measure twice and cut once. We must get this right the first time.

It is for this reason I urge all of you to heed the advice of moving the lines back to Highway 217. Only moving the lines inland can ensure necessary lasting results.

Sincerely,
Jason Crawford

Flag Status: Purple

Honorable County Supervisors:

I was an intern on this project for the Environmental Defense Center while attending law school. My role included interviewing many UCSB geology professors and getting their point of view on what should be done in regards to Goleta Beach Park erosion issues. Taking into account my knowledge obtained from interviewing the professors, memorandums which I drafted regarding the geology professor interviews and all the additional work that has been put into coming up with a viable and sensible solution to the erosion problem, I am supporting Goleta Beach 2.0 and am hopeful that the Board of Supervisors will lend their support to this plan.

Please support "Goleta Beach 2.0." It is an innovative plan to protect and enhance Goleta Beach County Park. The Parks Department's new plan preserves and expands the beach by over an acre! It improves bicycle circulation, adds kayak rentals, trails and other recreational improvements, and it removes the unpermitted rock seawalls which damage the beach. Dear Honorable County Supervisors:

I support "Goleta Beach 2.0" as an innovative plan to protect and enhance Goleta Beach County Park. Keeping our beaches as natural as possible is a very important step to maintaining ecological functions of the ocean environment. The removal of rock seawalls, which erode sand from our beaches, is an important component of the project, and the Parks Department's new plan would preserve and expand the beach by over an acre! Relocating the sewer and utility lines out of the "critical erosion zone" the plan is a long-term solution.

The County's sewer line should be moved all the way back to Highway 217 to avoid future sewage spills on the beach and avoid the need to consider a controversial "backstop revetment" seawall which would damage the beach.

Goleta Beach 2.0 protects the Park and the environment and is far less costly than prior proposals which have been rejected by the Coastal Commission.

Honorable County Supervisors:

Though i've temporarily moved out of Santa Barbara County, my keen interest in the coastal and land use management of the County-- one of the most beautiful and environmentally important in the Country-- only continues to grow. Accordingly, toward the goal of best protecting our County's invaluable coastline and marine environment, **please support "Goleta Beach 2.0."** It is an innovative plan to protect and enhance Goleta Beach County Park. The Parks Department's new plan preserves and expands the beach by over an acre! It improves bicycle circulation, adds kayak rentals, trails and other recreational improvements, and it removes the unpermitted rock seawalls which damage the beach.

The plan is an excellent, long-term solution which relocates the County's sewer line, the gas line and other utility lines out of the "critical erosion zone". The County's sewer line really should be moved all the way back to Highway 217 to avoid future sewage spills on the beach and avoid the need to consider a controversial "backstop revetment" which would harm the beach and the public's ability to enjoy it.

Goleta Beach 2.0 protects the Park and the environment and is far less costly than prior proposals which have been rejected by the Coastal Commission.

I urge you to support Goleta Beach Park, and to direct your staff to pursue all options to move the County's sewer line further inland. Thank you very much for your consideration of my comments.

Sincerely,

Dear Board of Supervisors,

It makes no real sense to have a sewer line where it is so vulnerable to damage and can readily leak onto the beach and into the ocean. It needs to be moved back. And let's get rid of that seawall; we know seawalls are poor long term solutions and that they create as many problems as they're supposed to solve, so why do we keep applying the same unworkable solution? I support Goleta Beach 2.0 and I hope you will too.

Thanks Much for all you do for our community!

Dear Honorable County Supervisors:

I support “Goleta Beach 2.0” as an innovative plan to protect and enhance Goleta Beach County Park. It's time we learned from past mistakes. Traditional beach armoring alternatives don't work. Although they may provide a tempting short term solution, over the long term they interfere with natural coastal processes, are ugly, degrade our beaches, and transfer coastal erosion issues to other areas in unpredictable ways. Add to these costs, the enormous monetary expense of ongoing and eternal maintainance.

The Parks Department’s new plan provides a variety of benefits. Goleta Beach 2.0 protects the Park, protects the environment, improves recreational facilities and is far less costly than prior proposal which have been rejected by the Coastal Commission. By relocating the sewer and utility lines out of the “critical erosion zone” the plan is a long-term solution. The County’s sewer line should be moved all the way back to Highway 217 to avoid future sewage spills on the beach and avoid the need to consider a controversial “backstop revetment” seawall which would damage the beach.

Please support Goleta Beach Park and direct staff to pursue all options to move the sewer line further inland. It's just the sensible thing to do.

Sincerely,

Ben Pitterle

Dear Honorable County Supervisors :

I and many others in the community support "Goleta Beach 2.0" as an innovative plan to protect and enhance our natural jewel, Goleta Beach County Park .

The Parks Department's new plan preserves and expands the beach by over an acre!

It adds recreational facilities like kayak rentals and trails and removes the unpermitted rock seawalls which damage the beach.

By relocating the sewer and utility lines out of the "critical erosion zone" the plan is a long-term solution.

The County's sewer line should be moved all the way back to Highway 217 to avoid future sewage spills on the beach and avoid the need to consider a controversial "backstop revetment" seawall which would damage the beach.

Goleta Beach 2.0 protects the Park and the environment and is far less costly than prior proposal which have been rejected by the Coastal Commission.

We urge you to support Goleta Beach Park and direct staff to pursue all options to move the sewer line further inland.

Sincerely,

James Studarus
359 Cannon Green Apt G

**Santa Barbara County
Board of Supervisor
Santa Barbara, California**

Dear Board Members:

The time has come to stand up for for the beach environment of Santa Barbara County for the benefit of all of the people. The California Fisheries and Water Unlimited support the protection and enhancement of the Goleta County Park. As such I urge you to vote for the Goleta Beach 2.0 alternative as the plan to implement. The sewline must be moved inland to Highway 127. That would be fair, reasonable, and in the greater public interest.

Also, the Golleta County Park must be accessible ro accomodate disabled persons pursuant to State of California statutes to prevent discrimination against disabled persons. Disabled persons can be children, women, men, the elderly, and war veterans. Disabled person do not need to be in wheelchairs to be disabled. I request that the Park be totally accessible to accomodate disabled persons. i.e. Legal Rights of Persons with Disabilities; California Department of Justice, November 2003.

I am not new to Santa Barabara County. I was significantly involved with attempting to restore the pre-project endangered southern steelhead fishery of the Santa Ynez River below Brabury Dam.

Thank you for listening.

Respectfully

**Robert J. Baiocchi, President, Age 79
California Fisheries and Water Unlimited
California Non-Profit Corporation

Dear Honorable County Supervisors:

As you may know, I have been involved in coastal planning issues in Santa Barbara County for about 20 years. I am the author of two recent reports – Developing Adaptive Policy to Climate Disturbance in Santa Barbara (2009), and the forthcoming report entitled Coastal Biodiversity Planning for Santa Barbara County's Gaviota Rural Plan (published by UC Santa Barbara's Ocean and Coastal Policy Center - <http://ocpc.msi.ucsb.edu/pdfs/ClimateDisturbanceRpt.pdf>). Both reports emphasize the importance of developing plans that can protect the region's significant coastal areas.

I support "Goleta Beach 2.0" as an important step towards better protection of Goleta Beach County Park. The Parks Department's plan describes a strategy that can support the expansion of the beach by over an acre. In addition, the plan supports additional recreational facilities, and would include the removal of the unpermitted rock seawalls which have been shown to impact the beach ecosystem.

By relocating the sewer and utility lines out of the "critical erosion zone" the plan offers a long-term resolution to a critical coastal issue. The County's sewer line should be moved back to Highway 217 to reduce the risk of a sewage spill on the coast, and to avoid the placement of a controversial "backstop revetment" seawall that would damage the beach.

In my view, Goleta Beach 2.0 protects the Park and the coastal ecology, and is a cost effective response.

I urge you to support Goleta Beach Park and direct staff to pursue all options to move the sewer line further inland.

Sincerely,
Michael Vincent McGinnis, PhD
Resident, Santa Barbara County

Dear Honorable County Supervisors :

It's been a long journey to reach a workable plan for Goleta Beach that meets Coastal Act criteria. I urge your support of.. "Goleta Beach 2.0" as an innovative plan to protect and enhance Goleta Beach County Park .The new plan

- preserves and expands the beach by over an acre,
- adds recreational facilities like kayak rentals and trails and
- removes the unpermitted rock seawalls that damage the beach.

By relocating the sewer and utility lines out of the "critical erosion zone" the plan is a long-term solution. The County's sewer line should be moved all the way back to Highway 217 to avoid future sewage spills on the beach and avoid the need to consider a controversial "backstop revetment" seawall which would damage the beach.

Goleta Beach 2.0 protects the Park and the environment and is far less costly than prior proposal which have been rejected by the Coastal Commission.

I'm sorry I won't be able to make the hearing, but I wanted you to know that I've followed this issue since 2003, used it in my class on coastal law and policy at UCSB, and am glad to finally see a workable plan reach the Board. I urge your support of this plan for Goleta Beach Park, and hope you will also direct staff to pursue moving the sewer line further inland.

Sincerely,

Gail Osherenko

Re: Goleta Beach 2.0

Dear Honorable Supervisors,

As a Third District Goleta-area resident, I am writing to urge you to follow your staff's recommendation and initiate engineering and environmental review of Goleta Beach 2.0.

The community has grappled for years to come up with this solution to preserve and enhance Goleta Beach Park.

Prior proposals were rejected as being too heavy-handed, environmentally insensitive and out of compliance with environmental laws.

The new plan is an innovative, out-of-the box approach which is exactly what is needed to break the logjam and move the Goleta Beach effort forward.

Goleta Beach 2.0 moves threatened sewer and utility lines and parking spaces inland out of harms way. Moving the lines inland makes good sense and is good, long-term planning. In fact, the utility lines are located in the critical erosion zone and should be moved inland to Highway 217 to avoid future sewage spills on Goleta Beach. Moving the lines further inland will also avoid future calls for ecologically-damaging seawalls or revetments.

The Coastal Commission action last year was clear guidance not to pursue a structural solution. The Coastal Act and LCP both favor non-structural solutions which do not interrupt sand movement along the coast and which do not redirect

erosion problems and causes beaches to erode. Goleta Beach 2.0 preserves and enhances the Park, protects the beach (and down-coast beaches) while adding an acre of sand. It is environmentally sustainable and is supported by the Coastal Commission, community groups, scientists, and park users.

Goleta Beach 2.0 will protect the restaurant, the pier, and all park infrastructure while respecting the ocean's natural processes. The new plan is a win-win for the environment and park users.

Please put an end to years of costly debate and take a solid step toward protecting our beloved Goleta Beach Park by initiating Goleta Beach 2.0.

Thank you.

Sincerely,

Ian Hogan

County Board of Supervisors,

I am writing to urge you to move forward with the Goleta Beach 2.0 plan. The plan protects Goleta Beach, is less costly than other options and has very little environmental impacts. Please also consider moving the sewer and utility lines as far back from the erosion zone as possible so rock revetments will not be needed in the future.

Thank you,

Chris Darancette

Hello County Board of Supervisors,

I am a student at UCSB. I am writing to urge you to consider and implement the Goleta Beach 2.0 plan. I think it would be a positive improvement, as well as a good way to make a good name for the Board. I also feel that moving the utilities and sewer lines back is a crucial topic to consider. I hope you guys follow through; it would be appreciated by the environment and the community.

Thank You For Your Time,
Jeff Svoboda

Hi,

My name is Heather Christian I'm a student at UCSB and a frequent user of Goleta Beach. I've recently become aware of the Goleta Beach 2.0 project and would like to share my opinion. Can you please distribute this message to the board members and staff.

I support the general idea of Goleta Beach 2.0 as it is the best option to the erosion problem. The rocks along the beach really need to be removed because it has been shown that rock walls like the one at Goleta Beach cause severe problems over time. To make sure another rock wall does not need to be used in the future please consider moving the utility and gas lines as far away from the beach as possible so the buried rock wall will not need to be used.

Thank you,

Heather Christian

Dear Supervisors,

I support "Goleta Beach 2.0" as an innovative plan to protect and enhance Goleta Beach County Park. The Parks Department's new plan preserves and expands the beach by over an acre! It adds recreational facilities like kayak rentals and trails and removes the unpermitted rock seawalls which damage the beach.

By relocating the sewer and utility lines out of the "critical erosion zone" the plan is a long-term solution. The County's sewer line should be moved all the way back to Highway 217 to avoid future sewage spills on the beach and avoid the need to consider a controversial "backstop revetment" seawall which would damage the beach.

Goleta Beach 2.0 protects the Park and the environment and is far less costly than prior proposal which have been rejected by the Coastal Commission.

I urge you to support Goleta Beach Park and direct staff to pursue all options to move the sewer line further inland.
