File #: 17-00795, **Version:** 1

Consider recommendations regarding Goleta Slough Hydraulic Dredging Project, Second District, as follows:

Acting as the Board of Directors, Flood Control and Water Conservation District:

- a) Find that the bids received for the Goleta Slough Hydraulic Dredging Project must be rejected because the hydraulic dredging cannot proceed due to sediment containing levels of fine-grained material beyond what is permitted for beach nourishment and regulatory agencies are unwilling to approve beach deposition of sediment containing more than 25% fine grain material; and
- b) Find that the recommended action, to reject bids, is a fiscal activity not constituting a “Project” within the meaning of the California Environmental Quality Act, as set forth in California Environmental Quality Act Guidelines Section 15378(b)(4) and statutorily exempt as noted in California Environmental Quality Act Guidelines Section 15270 as a rejection of a project.
